Section 1–Care Management Program Overview

Organizational Overview
Qualis Health’s mission is to generate, apply, and disseminate knowledge to improve the quality of healthcare delivery and health outcomes. In executing Qualis Health’s mission and striving toward Qualis Health’s vision to be recognized for leadership, innovation, and excellence in improving the health of individuals and populations, Qualis Health is guided by the following set of core values:

- **Integrity and professionalism**—Qualis Health performs its work in an objective and unbiased manner and interacts with providers, Medicaid recipients, and program stakeholders in a respectful and professional manner. Qualis Health’s employees receive comprehensive training and continuing education to ensure they are highly skilled and knowledgeable, and Qualis Health monitors their own performance as Qualis Health strives to assure accuracy and high technical quality in the review services Qualis Health provides.

- **Collaboration**—Qualis Health promotes collaborative relationships, both internally and externally. Qualis Health values diversity of opinion, background, and perspectives among Qualis Health’s employees, clients, and collaborators. Qualis Health follows established processes and procedures that promote both collaboration and quality in the provision of review services, and Qualis Health collects and report on relevant review data that can be used to identify opportunities to improve the delivery of healthcare and patient outcomes.

- **Stewardship**—Qualis Health conducts work knowing that the primary objective of clients is to maximize healthcare value by assuring high quality and cost effectiveness. Qualis Health seeks to apply technical and professional innovations that assist us in serving as good stewards of healthcare resources.

Purpose of Care Management
The purpose of Qualis Health’s Care Management program for the State of Alaska, Department of Health and Social Services, is to provide utilization review and care coordination services. Qualis Health’s services help ensure appropriate medical services are provided to Alaska Medicaid recipients at a reasonable cost and in accordance with state and federal regulations, statutes, and policies. Qualis Health has been providing care management services for Alaska Medicaid for more than 20 years.
Definitions of Utilization Management and Care Coordination
Qualis Health’s care management programs use the following definitions for utilization management (UM) and care coordination (CC):

- **Utilization Management (UM)** — Evaluation of the medical necessity, appropriateness, and efficiency in the use of behavioral healthcare services under the provisions of the applicable health benefits plan; evaluations are also known as “utilization review.”

- **Care Coordination (CC)** — A service that assists Psychiatric Residential Treatment Facility providers to connect youth with special behavioral healthcare needs to services and resources within the State of Alaska, in a coordinated effort to maximize the potential outcome for the youth. Care coordination seeks to ensure optimal behavioral healthcare for youth.

Comparison between Utilization Management and Care Coordination
The table below compares UM and CC services.

<table>
<thead>
<tr>
<th>UM Services</th>

History of Medicaid Utilization Review and the Quality Improvement Organization (QIO) Program in Alaska

Medicaid, an entitlement program created by the federal government, is the primary program financing basic health and long-term care services for low-income Alaskans. The Alaska Department of Health and Social Services maintains the Medicaid core services for the State of Alaska. The Alaska Medicaid program provides both mandatory prior authorization review and optional care coordination facilitation services. Eligibility for Medicaid services is determined by medical necessity and the eligibility category of the recipient.

The federal government has expended significant dollars in developing and supporting the utilization review of inpatient hospital care. This type of review has been required by law for Medicare and state Medicaid programs since 1972.

Alaska Department of Health and Social Services has historically contracted with a peer review organization (PRO)—now called a quality improvement organization (QIO)—to review selected inpatient admissions for medical necessity and appropriateness. A QIO is an organization that meets federal requirements for utilization and quality control review and holds a Medicare contract with the Centers for Medicare & Medicaid Services (CMS).

Qualis Health, the CMS Medicare QIO for the states of Washington and Idaho, has been an Alaska Medicaid contractor since 1985, performing utilization reviews and prior authorization services. Reviews are performed on admission, concurrent continued stay, or retrospective basis.

Qualis Health’s Background and Experience

Qualis Health is a private, nonprofit healthcare QIO with 32 years of experience in providing utilization review, case management, and quality improvement services. Qualis Health is based in Seattle, Washington. Qualis Health also has regional offices in Birmingham, Alabama; Anchorage, Alaska; Irvine, California; Boise, Idaho; and Albuquerque, New Mexico.

Established in 1974, Qualis Health started out as a professional standards review organization (PSRO) for Medicare in the State of Washington. As a PSRO for the first legislated Medicare quality review program, Qualis Health conducted retrospective reviews of hospitalizations to determine whether they were medically necessary. Qualis Health’s Medicare review activities expanded to Alaska in 1984 and to Idaho in 1986.

Qualis Health began offering utilization review services to the Medicaid population in Washington State in 1975. In 1985, Qualis Health was awarded the utilization review contract with Alaska Medicaid. Qualis Health currently serves as a Medicaid contractor in the states of Alabama, Alaska, Idaho, New Mexico, and Washington.
Qualis Health started offering utilization review services to private industry in 1979. Qualis Health has been a presence in the private-sector market in Alaska since 1984, when the first care management client was added.

Today, Qualis Health continues to serve all three sectors—Medicare, Medicaid, and private industry. Because Qualis Health is a third-party that is not affiliated with any provider organizations nor with the insurance industry, the organization is able to objectively evaluate the medical necessity and quality of healthcare provided to the clients served.

For Medicaid and private-sector customers, Qualis Health offers a range of programs designed to control healthcare costs while improving the quality of healthcare delivered to consumers. These programs include traditional utilization management services, including psychiatric review services, such as pre-service admissions, concurrent, retrospective chart, and retrospective telephonic reviews; coding validation; and medical consultation.

In the late 1980s, Qualis Health launched nurse case management services for Medicaid and the private-sector. Qualis Health’s Medicaid case managers work with patients who have catastrophic illnesses and injuries. They also work with these patients’ families, providers, physicians, and Alaska Medicaid to promote the right care at the right time and in the right setting. Qualis Health’s case management program is nationally recognized for excellence and superior results.

Qualis Health’s offices in Seattle and Anchorage have full accreditation from URAC for their Health Utilization Management and Case Management programs, demonstrating compliance with the highest industry standards for pre-service, concurrent, retrospective reviews, and case management services. The URAC accreditation for Health Utilization Management assures providers, physicians, and patients that the review processes Qualis Health follows are fair and impartial, and that URAC standards for review timeframes, reviewer qualifications, appeal procedures, and confidentiality of information are met, thus resulting in high quality services and objective review decisions.

**Qualis Health’s Professional Expertise**

More than 200 Qualis Health professionals, including department leaders, medical directors, clinical reviewers, case managers, Care Coordinators, quality improvement specialists, biostatisticians, communications specialists, information technology specialists, and administrative support staff, work hard to serve the needs of various clients. In addition, Qualis Health has an extensive network of more than 300 physicians who serve as consultants to the organization and provide collaborative clinical peer review services. The network includes physicians representing all 24 of the specialty boards recognized by the American Board of Medical Specialties as well as dentists, chiropractors, naturopaths, and other complementary and alternative medicine practitioners.
Qualis Health’s employees have well-established relationships with facilities and health plans, allowing for effective collaboration in healthcare evaluation and improvement. As part of a continuing effort to work in cooperation with the community, Qualis Health is actively pursuing new provider and physician partnerships.

Section 2–Communications with Qualis Health

Introduction
Qualis Health’s review process is flexible and is set up to handle review requests received via the internet, telephone, fax, and mail. Qualis Health offers secure web-based review capability using the internet to create a two-way link that can be used to exchange care management data, thus facilitating real-time, online approvals. Qualis Health also maintains toll-free, dedicated phone and fax numbers for Medicaid providers to use to request review services.

Qualis Health’s regular business hours are 8:00 am to 5:00 pm Alaska Time, Monday through Friday; excluding scheduled holidays (see Appendix F). Qualis Health staff members are available to handle telephonic review requests received from 8:00 am to 5:00 pm on regular business days.

Contacting Qualis Health via the Internet
Providers submitting web-based review requests will need to obtain a User ID and password to log in and access the web-based review system. Trained providers can log in and directly enter information for the admission (i.e. initial review; continued stay/concurrent review, or retrospective review request).
For more information, or to learn how to submit web-based review submissions, please visit: http://www.qualishealth.org/healthcare-professionals/alaska-medicaid-behavioral-health/provider-education or contact Qualis Health at (877) 200-9046 or (907) 550-7620.

Contacting Qualis Health by Mail
Requests for prior authorization certification for admissions and concurrent (continued stay) treatment services, and requests for retrospective reviews may be submitted on the web via the web-based review system (preferred method), fax, phone, or mail.
Requests submitted by mail to Qualis Health’s Anchorage office should be sent to:
Qualis Health
Attn: Utilization Review Department
PO Box 243609
Anchorage, AK 99524-3609

Contacting Qualis Health by Phone
To reach Qualis Health’s telephonic review services, call (877) 200-9046 or (907) 550-7620. In the event your call is after business hours, or an attendant is not available, your call will be directed to Qualis Health’s 24-hour voice mail system.

During regular business hours, Qualis Health monitors the voice mail system checking messages and ensuring callbacks are handled in a timely manner. Messages left after 5:00 pm, on weekends or holidays are retrieved on the next business day and calls are returned by 12:00 pm Alaska Time.
Contacting Qualis Health by Fax
Providers may fax review requests to Qualis Health at (877) 200-9047 (The preferred method of submitting a review is electronically via the Web-based review system). Faxed submissions must be legible and include all required demographic and clinical information that is found on the questionnaire forms (see Appendix H, Exhibits 7 and 8). Completed questionnaires can be faxed to (877) 200-9047. A fax cover sheet with a confidentiality disclaimer is highly recommended.

The following are suggestions in submitting your fax
- No bold font
- No italics
- No underlining
- No all caps
- If possible no special characters, i.e., * or = (quotes are OK)
- Sans serif fonts
- Normal spacing (i.e., looks like a normal document not written in a column that takes up a horizontal third of the page)
- Typed is preferred over handwritten

Please answer all questions as detailed as possible. If the answer to a question is unknown, please write in that the information is unknown.

Qualis Health’s Communication of Review Determinations
Our secure web-based prior authorization review system offers immediate feedback from Qualis Health concerning the request for review—pended awaiting review, certified, pended for further review, or additional information required. For requests submitted through web-based review system, an internet-based notification of the final determination and certification number is posted for the provider. Providers using the web-based system for their request submissions will not need to wait for a phone call or for the transmission of a fax or mailed document to learn of the final determination.

For requests that are not submitted through the web-based review system, Qualis Health will communicate the determination and the Prior Authorization number (i.e., the certification number) to the provider via phone or fax. Qualis Health will send letter notifications for all non-certified reviews (adverse decisions) and appeal reviews within one business day after the determination is given. These notifications will be sent to the recipient, State of Alaska Division of Behavioral Health, the attending physician, and the facility within one business day of the date the decision is made.
Section 3—Compliance with URAC's Utilization Review Standards

Frequently Asked Questions about Utilization Review Decisions

Qualis Health complies with URAC health utilization management (UM) standards when performing utilization reviews (UR). These standards provide a process for conducting a utilization review that is clinically sound and respects recipients’ and providers’ rights. URAC standards ensure that only appropriately trained, qualified clinical personnel conduct and oversee the utilization review process; that a reasonable and timely appeals process is in place; and that medical decisions are based on valid clinical criteria. Some frequently asked questions about the process of making utilization review decisions are answered in the following section.

1. Who makes the utilization review decision?
   URAC (formerly known as Utilization Review Accreditation Committee) Health Utilization Management Accreditation requires Qualis Health to use a three-step process to determine if a proposed medical treatment or service is medically necessary:

   • **Initial Clinical Review**—A licensed mental health professional conducts this first critical step of the review process using Alaska State Medicaid Program Medical Necessity Criteria and review protocols. If the clinical information provided does not meet current Alaska State Medicaid Program Medical Necessity Criteria and review protocols for inpatient services, or if, in the clinical reviewer’s judgment, a physician should review the case, it is referred for peer clinical review.

   • **Peer Clinical Review**—A licensed physician qualified to render a clinical opinion about the proposed treatment or service performs a peer clinical review by reviewing all available information and then making a decision about certifying care. When a potential non-certification decision is made, the attending physician has the opportunity to discuss the review and proposed care with a Qualis Health physician, prior to final determination. If the result of that conversation is not satisfactory for the attending physician, an appeal process is available.

   • **Appeal Process**—A provider or recipient may initiate an appeal when the final determination is unsatisfactory. The appeal review is performed by a qualified, Board-certified physician within the same specialty but not involved in the initial review decision. The process may be expedited, if requested (See Section 16).

2. Why is a peer-to-peer conversation important?
   The goal of the peer-to-peer conversation is to allow the treating provider an
opportunity to discuss a UM determination before the non-certification decision is finalized. It is hoped that some differing opinions can be resolved without the need for a formal appeal process.

3. What are the timeframes for peer-to-peer conversation?
Qualis Health offers a peer to peer conversation for potential adverse decisions (non-certifications), within URAC timeframes, when the Qualis Health’s physician reviewer is unable to authorize a review based on the information provided. A Qualis Health representative will notify the facility utilization review staff of the potential non-certification and offer the option of a peer-to-peer discussion. If a peer-to-peer conversation is desired by the attending physician, it is necessary to call Qualis Health and complete the peer review by 5:00 pm Alaska Time. If the attending physician’s not able to call within the stated time frame, and an extension is desired, the facility UM staff may request an extension from Qualis Health within the timeframes given in the offer for the peer review.

If the case is non-certified after the peer-to-peer conversation, the stay will be non-certified retroactively to the day medical necessity was determined as not met. If the attending physician does not call within the timeframes given in the offer for the peer review, and other arrangements have not been made by the facility within the allotted timeframes, the case will be non-certified.

The physician may call Qualis Health at (877) 200-9046 or (907) 550-7620 to make arrangements for the peer review conversation.

4. What recourse is there when we disagree with a Qualis Health determination?
Qualis Health’s written notice of non-certification decision contains instructions of initiating an appeal of the non-certification. Please see Section 16 of this manual for details on the appeal process. If, after an appeal, you still disagree with the Qualis Health determination, your appeal letter will outline the steps that must be taken to request a hearing with the State of Alaska Behavioral Health.

5. What is considered an urgent review?
An urgent review is performed when a case involves urgent care and the application of the time periods for making non-urgent care determinations (a) could seriously jeopardize the life or health of the recipient or the ability of the recipient to regain maximum function, or (b) in the opinion of a psychiatrist with knowledge of the recipient’s behavioral health condition would subject the recipient to severe risk that cannot be adequately managed without 24/7 inpatient psychiatric care.
6. How are review timelines determined?

The number of days allotted for each type of review for this Alaska Medicaid program is based on URAC Utilization Review Standards and on Alaska State Medicaid Program Medical Necessity Criteria and review protocols. Review timelines differ for urgent reviews and non-urgent reviews. If the review requires additional information, additional time is allotted. Tables of review timeliness are shown in following pages under questions 7 and 8 of this section.

When additional information is required to complete the review, the timeline is adjusted accordingly. When this occurs, it is the provider’s responsibility to provide Qualis Health the additional information requested to complete the review. If the information is not received within five business days, the review will be completed with the information already received, putting the case at risk of a potential non-certification.

In rare instances, Qualis Health may choose to exercise a single extension of up to 15 calendar days on non-urgent reviews for both acute and Psychiatric Residential Treatment Facilities (PRTF) care when there are reasons beyond the control of the organization that require an extension. When this occurs, Qualis Health must inform the provider (by the date the notice the initial decision would normally be due) of the circumstances that require the extension and the date by which it expects to reach a decision. This single extension is only allowed on non-urgent reviews; it is not allowed for urgent care reviews.
7. What are the timeframes for completion of urgent reviews?

*See definition of Urgent Review on page 9*

When all necessary clinical information has been received and no referral for clinical peer review is needed, the timeframes for completion of urgent reviews are as follows:

<table>
<thead>
<tr>
<th>Review Type for Prior Authorization—Urgent</th>
<th>Timeframes for Completion from Date of Notification to Qualis Health</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior Authorization Admission (Pre-service) Review—Urgent</td>
<td>Determination and notification are made within 72 hours of receipt of request.</td>
</tr>
<tr>
<td>Prior Authorization Concurrent (Continued Stay) Review—Urgent</td>
<td>Determination and notification are made within 24 hours of the request provided the request is made at least 24 hours prior to the expiration of the certified period of time. If the request is not made at least 24 hours prior to the expiration of the certified period, the determination and notification is made within 72 hours after the receipt of the request for review.</td>
</tr>
</tbody>
</table>

When additional information is required to complete the review, the timeline is adjusted accordingly.
8. What are the timeframes for completion of non-urgent reviews?

When all necessary clinical information has been received and no referral for clinical peer review is needed, the timeframes for completion of reviews are as follows:

<table>
<thead>
<tr>
<th>Review Type for Non-Urgent</th>
<th>Timeframes for Completion from Date of Notification to Qualis Health</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior Authorization Admission (Pre-service) Review—Non-Urgent</td>
<td>Determination and notification are made within five calendar days of receipt of request.</td>
</tr>
<tr>
<td>Prior Authorization Continued Stay (Concurrent) Review—Non-Urgent</td>
<td>Determination and notification are made within four calendar days of receipt of request.</td>
</tr>
<tr>
<td>Retrospective Review</td>
<td>30 calendar days</td>
</tr>
</tbody>
</table>

When additional information is required to complete the review, the timeline is adjusted accordingly. When this occurs, Qualis Health must inform the provider (by the date on which notice of the initial decision would normally be due) of the additional information required to complete the review.
This page intentionally left blank
Section 4–HIPAA

Business Associate Standing
Qualis Health provides care management services on behalf of its clients and is considered a “Business Associate” of these clients under the Health Insurance Portability and Accountability Act (HIPAA) “Administrative Simplification” regulations governing patient health information. These regulations include the Standards for Privacy of Individually Identifiable Health Information (“Privacy Rule”) and the Security Standard (“Security Rule”).

National Provider Identification
Software program and web based review system (JIVA) is currently accommodating Alaska Medicaid client and provider identification numbers in compliance with HIPAA. Covered entities under HIPAA are required to use National Provider Identifiers (NPIs) in standard transactions. Providers are responsible for obtaining their NPI from the National Provider System (NPS). The NPS is now contained within the National Plan and Provider Enumeration System (NPPES). This notice was published on May 30, 2007, in the Federal Register/Vol.72, No. 103, Pages 30011–30014, establishes the data that are available from the NPPES.
Section 5–Provider Billing Concerns

Claim Discrepancies
Providers are encouraged to thoroughly examine discrepancies in claims for accuracy prior to contacting Qualis Health. Xerox, the fiscal agent for the Alaska Department of Health and Social Services, has a provider inquiry telephone line for this purpose. Providers may contact the fiscal agent at (800) 770-5650 (toll-free in Alaska) or (907) 644-6800.

Providers may call Qualis Health to investigate a discrepancy that has caused or has the potential to cause a claim to fail. Some examples of such discrepancies are as follows:

- The date(s) on the Qualis Health review does not match the certified admission or discharge date on the claim.
- Admitting or principal diagnosis codes on the Qualis Health review do not match the code(s) on the claim.
- Incorrect recipient Medicaid Identification number indicated on the Qualis Health review.
- The Prior Authorization number used for billing does not match the Prior Authorization number on the Qualis Health review (Note: Prior Authorization Number must be noted on the claim).

Contingency for Payment
Qualis Health certification indicates only that the admission is medically necessary. This certification (approval) does not guarantee payment for services rendered. Payment is contingent upon eligibility and compliance with the rules and regulations that govern Medical Assistance in Alaska.
This page intentionally left blank
Section 6—Eligibility and Review Limits

Overview
The Alaska Medicaid Mental Health review program has been established to provide treatment providers a way to prior authorize medical necessity before services are rendered. The Federal and State Medicaid program was established as a prior authorization system and is regulated by Federal and State Codes.

There are times when Alaska Medicaid recipients could be covered under another insurance or program, and the requirements for review may vary. The following examples will assist you in determining which review requirements will apply.

Review Scope
Admission and continued stay reviews will be required for acute inpatient psychiatric services provided through specialized psychiatric hospitals, medical surgical hospitals, and Psychiatric Residential Treatment Facility services.

Under Age 21—Acute Inpatient Psychiatric Treatment Services and Residential Psychiatric Treatment Services
Acute inpatient psychiatric services and residential psychiatric treatment services are for those individuals under the age of 21 who are receiving necessary psychiatric services provided within an acute care hospital including an Institute for Mental Disease (IMD) or residential psychiatric treatment services. These services are under the direction of a physician designed to achieve the recipient's discharge to a lower level of care at the earliest possible time.

Ages 21 – 64—Acute Inpatient Psychiatric Treatment Services
Acute inpatient psychiatric services provided within a medical surgical hospital other than an IMD (as defined in 42 CFR 456.601) for recipients between the ages of 21 and 64.

Age 65 and Older—Acute Inpatient Psychiatric Treatment Services
Acute inpatient psychiatric services provided to a recipient age 65 or older by an inpatient program in a psychiatric facility, an IMD, or a medical surgical hospital.
Review Limits

All inpatient psychiatric (acute care) and inpatient residential psychiatric services (PRTF care) must be prior authorized in order to be reimbursed by Alaska’s Medicaid Program.

There are limits to the scope of reviews that Qualis Health is authorized to perform in the Alaska State Medicaid Program:

1. Qualis Health does not perform reviews for clients who are 21 to 64 years of age and are admitted to a free standing inpatient psychiatric facility. Alaska Medicaid does not cover admissions in these facilities for this age group.

2. Qualis Health does not perform reviews for CAMA Medicaid recipients. Medical Programs are established for CAMA Medicaid recipients under the Chronic and Acute Medical Assistance Program.

3. No inpatient psychiatric reviews are authorized for substance abuse or substance dependency treatment if those are the primary disorders being diagnosed and/or treated.

4. If the primary coverage is Medicare Part A and secondary coverage is Medicaid, no Medicaid review is required unless inpatient Medicare benefits have been exhausted or services are not covered by Medicare, in which case Qualis Health will proceed with a review for Medicaid.

5. No reviews are authorized for recipients over the age of 21 in a PRTF, unless the recipient is already receiving treatment in the treating facility when the recipient turns 21 years old. When this is the case, coverage is available until the recipient’s 22nd birthday.
Section 7–Utilization Review Methods of Submission
Submission Methods
Qualis Health will accept review requests submitted by providers over the internet *(internet is the preferred method of review)*, or via telephone, fax, or mail.

See the updated questionnaire within the provider manual at [http://www.qualishealth.org/healthcare-professionals/alaska-medicaid-behavioral-health/provider-resources](http://www.qualishealth.org/healthcare-professionals/alaska-medicaid-behavioral-health/provider-resources)

You will need to answer these review questions and include demographics in your submission (See Appendix H, Exhibits 7 and 8).

Provider Responsibility for Automated Voice Response

Providers are responsible to verify recipient eligibility for prior authorization of admission, continued stay, or retrospective review. The following information is available to assist the provider in the Automated Voice Response process.

ID Cards and Coupons—The Department of Health and Social Services, Public Assistance, produces and distributes medical assistance identification cards and medical coupons. These verify that a recipient is eligible to receive services from the Alaska Department of Health and Social Services in a given month. Cards and coupons contain the eligible recipient’s name, identification number, date of birth, eligibility month and year, and eligibility code. Please note that the Resource Code on the coupon or ID card will indicate if the recipient has a payment source in addition to Medicaid. Refer to your Provider’s billing manual from XEROX, the State’s fiscal agent, for further clarification.

Automated Voice Response System (AVRS)—The State’s fiscal agent (Xerox) provides and maintains the Automated Voice Response System (AVRS) to help providers determine the eligibility of the recipients. Each enrolled provider receives a unique AVRS PIN number and instructions for using AVRS. A provider with a touch-tone telephone can use the AVRS identification number to verify recipient eligibility 24 hours a day, seven days a week. The AVRS may be accessed by calling (800) 884-3223. Providers may receive Automated Voice Response by contacting Xerox, at (800) 770-5650 (toll-free in Alaska) or (907) 644-6800.
Section 8—Processes for Utilization Review Submissions

**Purpose**
Qualis Health has adopted a browser-based product that uses the internet to create a two-way link between healthcare providers and Qualis Health Utilization Management/Mental Health Review to facilitate the prior authorization review process. The web-based review system allows providers to submit utilization review requests to Qualis Health using a secure internet connection and is available to the provider 24 hours a day, seven days a week. Reviews submitted during non-office hours will be processed as received on the next business day (See Appendix G).

**Responsibility**
Providers are responsible for submitting all review requests as required by Alaska State Medicaid Program Medical Necessity Criteria and review protocols. Providers are responsible to submit all reviews to Qualis Health in a timely manner as required by Alaska Department of Health and Social Services. Providers are also responsible for submitting reviews to Qualis Health for recipients who are covered by other Third Party Liability (TPL) resources for admission and continued stay if utilizing Alaska Medicaid as a form of reimbursement.

**Requirements**
Use of the web-based review system requires internet access and establishment of provider logon information for each user. Training is conducted by Qualis Health via WebEx sessions. If you are interested in receiving training, please see Qualis Health’s website at:
http://www.qualishealth.org/healthcare-professionals/alaska-medicaid-behavioral-health/provider-resources
You may also contact Qualis Health’s Team by calling (800) 949-7536 x 2800 or by email to ProviderPortalHelp@qualishealth.org.

**Process and Procedures**
**Submission**—If you have already received web-based review submission training from Qualis Health, submit your review requests via the internet 24 hours per day at the following web address:
https://qualishealthpp.beomega.com/cms/ProviderPortal/Controller/providerLogin
Operational hours for Qualis Health Alaska Medicaid Behavioral Health reviews are:
8:00 am to 5:00 pm Alaska Standard Time Monday through Friday except for designated holidays (See Appendix F)
The provider may submit the prior authorization review request to Qualis Health via web-based review system (preferred method), or by phone, fax, or mail (See Section 7).

<table>

<tbody>
<tr>
<td><strong>Qualis Health Provider Portal</strong></td>
</tr>
<tr>
<td><strong>Phone</strong></td>
</tr>
<tr>
<td><strong>Fax</strong></td>
</tr>
<tr>
<td><strong>Mail</strong></td>
</tr>
</tbody>
</table>

Calls to the above listed phone number will connect to a Qualis Health representative. In the event that no one is immediately available, callers may leave a message in the confidential voice mail system. Instructions are clearly stated for accessing the electronic voice mailboxes, which are monitored so that calls may be returned in a timely and efficient manner.

**Required Review Documentation**—Provider will complete the questionnaire for admission or continued stay reviews. Use the most recent questionnaire (either the admissions or continued stay questionnaire) to prepare for the questions that will be asked in the review process. Please see Appendix H, Exhibit 7 for the *Admission Review Questionnaire* and Appendix H, Exhibit 8 for the *Continued Stay Review Questionnaire*.

Additional information listed in Sections 9 and 10 and Appendices E and H of this manual are also needed for each review/request.

**Document the following information in the Communication field:**

- contact name and phone number of the person providing the review information
- type of review being submitted: (e.g., Admission review, Continued Stay review, or Retrospective review)
- actual admit date and discharge date
- verification of the recipient’s Medicaid eligibility
Medical Necessity Screening—Once the information for the specific review period has been received, Qualis Health’s clinical reviewer will assess the medical information using Alaska State Medicaid Program Medical Necessity Criteria and review protocols to determine whether the condition of the recipient meets the Severity of Illness and Intensity of Service requirements for the level of care and the type and number of days of services requested. If the Alaska State Medicaid Program Medical Necessity Criteria and review protocols are met, the Qualis Health clinical reviewer will issue a Prior Authorization number and the review will be certified (See Appendix H, Exhibit 1). For additional information on medical necessity information required for determinations, see Appendices B & C.

Second-Level Peer Review—Cases that clinical reviewers have determined do not meet criteria are referred to a Qualis Health physician reviewer (medical director or physician consultant). The physician reviewer will review the clinical information and either certify the admission or issue a potential non-certification. In the event of a potential non-certification, the attending physician will be given an opportunity to discuss the review with the Qualis Health physician reviewer. If a peer-to-peer conversation is requested, Qualis Health’s physician reviewer and the recipient’s attending physician will discuss the treatment issues, current clinical information, as well as appropriate alternatives. Following the discussion, Qualis Health will either certify or non-certify the medical review.

Non-certifications—If the Qualis Health physician reviewer non-certifies the medical review, a Qualis Health representative will notify the appropriate facility by web-based review system or by fax. If the peer review offer is not accepted or completed by the timeframe given in the offer, Qualis Health will send the non-certification letter within one business day to the following parties: the guardian or parents of recipient (if minor), recipient (if an adult), attending physician, facility, and State of Alaska Behavioral Health.

If the attending physician is not able to call within the stated timeframe and an extension is desired, the provider must notify Qualis Health of their request for an extension within the timeframe given in the peer review offer.

The non-certification letters (adverse determinations) will contain justification for the non-certification and an explanation of the right to request an appeal of Qualis Health’s initial non-certification determination (See Appendix H, Exhibits 3 and 4).

The Alaska Department of Health and Social Services will not reimburse providers for services that have been non-certified by Qualis Health, with the exception of non-certifications that are reversed as a result of an appeal review performed by Qualis Health or a second level provider appeal or recipient Fair Hearing by the State.
Questionnaires—Questionnaires and checklists within the web-based review system are associated with specific behavioral health medical necessity review requirements. Use the updated questionnaires for your review process (See Appendix H, Exhibits 7 and 8). Both questionnaires are also available online via https://qualishealthpp.zeomega.com/cms/ProviderPortal/Controller/providerLogin. Questionnaire templates within web-based system provide many selection drop-down boxes that save time in the review process.

Process and Procedures for Urgent Inpatient Admissions
When an urgent admission is necessary, providers are required to notify Qualis Health of their request for urgent admission reviews within one business day. This can be accomplished by web-based review system (preferred method), or by calling/faxing the toll-free number during normal business hours. A Qualis Health representative will review the detailed message that can be left on the electronic voice mail system. In order for Qualis Health to prioritize callbacks appropriately, the pertinent information must be given when leaving a message. This includes:

- Your name
- Your telephone number, including area code, beeper number, or extension
- Physician’s full name
- Recipient name (with the correct spelling)
- Recipient ID number (Medicaid)
- Recipient date of birth
- Facility name
- Date and time of admission
- ICD-10 Code

Leaving the information in the electronic voice mail system does not complete the review process nor does it automatically certify the review. All other requirements of the review process must also be completed. Qualis Health will return your call and assist you with completing the review process. The care and treatment of the recipient should never be delayed, particularly in urgent situations, in order to obtain Qualis Health certification.
Procedures for Admissions or Continued Stay (Concurrent) Reviews—Due on Weekends and Holidays
In those instances where the concurrent review date falls on a weekend or holiday, the following procedure is to be followed:

If the concurrent review is due on Saturday, Sunday or a holiday, the concurrent review will take place on the following Qualis Health business day. Non-certification can be retrospective to the first day the recipient was not meeting the level of care criteria or protocols.

Late Submission Review Requests
If the provider submits a request for a review within 30 days of the next review due date, the review is handled as any other concurrent (continued stay) review.

Requests for Admissions that are not made within 30 days of admission and before the recipient discharged from the facility, or Continued Stay Reviews that are not made within 30 days of the end certification date are late submission reviews. Late submission reviews require that the fully completed Late Submission/Retrospective Review Form (See Appendix H, Example Exhibit 11). This form must be sent to Qualis Health prior to submitting the clinical information for review. On this request from the provider it must include the reasons for the extenuating circumstances causing the delay in submitting the review.

The review may proceed once the late submission/retro review request form (Appendix H, Example Exhibit 11) is received by Qualis Health giving the reasons for the late submission.

Chart Requests
Qualis Health may request the chart of a recipient to verify quality of care or accuracy of the information provided. The chart request may be made telephonically, through the web-based review system, or in writing.
This page is intentionally blank.
Section 9 – Prior Authorization for Admissions

Purpose
The purpose of a prior authorization review is to determine if the inpatient services are medically necessary and appropriate. The Alaska Medicaid Behavioral Health review program has been established to provide treatment providers a way to prior authorize before services are rendered. The Federal and State Medicaid program was established as a prior authorization system and is regulated by Federal and State codes. Providers are required to submit reviews in a timely manner.

Responsibility
Providers are responsible for obtaining the prior authorization review from Qualis Health. Qualis Health will accept information for prior authorization review from receiving providers. The clinical reviewer will receive all of the relevant clinical information to satisfy Alaska State Medicaid Program Medical Necessity Criteria and review protocols before the prior authorization review will be certified.

Requirements
All inpatient psychiatric (acute care) and inpatient Psychiatric Residential Treatment Facility care must be certified by Qualis Health in order to be reimbursed by Alaska Department of Health and Social Services.

The psychiatric evaluation must document a primary Behavioral ICD-10 Diagnosis Code (s) (Mental, Behavioral, and Neurodevelopmental Disorders (F01-F99) excluding any form of substance abuse disorder, intellectual disability, or developmental disorder. Diagnosis and/or treatment for a substance abuse disorder must be secondary to diagnosis and/or treatment for the mental health disorder in order to seek authorization for services. For neurodevelopmental disorders there must be documented evidence that the individual has the ability to benefit from PRTF services that would enable them to self-regulate behavior, modulate emotional reactivity, and improve developmentally appropriate functioning in major life domains.

The provider may submit the prior authorization review request to Qualis Health via web-based review system (QHPP preferred method), phone, fax, or mail (See Sections 7 and 8).
Non-State Custody Youth Processes and Procedures for Admissions to Out-of-State Psychiatric Residential Treatment Facilities (Both Urgent and Non-Urgent)

There is a specific process providers must use in order to receive Prior Authorization from Qualis Health for an admission to an out-of-state PRTF for a recipient. When the Acute Care Hospital, PRTF, or community provider recommend placement for a non-State custody youth, aged 21 or under, to an out-of-state PRTF, the following steps must be completed for approval:

• The referring agency must contact the Alaska Behavioral Health Utilization Review team and provide required clinical and discharge planning information (See Appendix I, Exhibit 9 for the link to the referral form).
• The State of Alaska Behavioral Health Utilization Review team will explore potential and available in-state resources that could meet the recipient’s treatment needs.
• The State of Alaska Behavioral Health Utilization Review team will send a fax to the referring agency and Qualis Health indicating Qualis Health is to review for medical necessity.
• The referring agency may then proceed with plans to discharge the recipient to the out-of-state PRTF. The out-of-state PRTF will submit the prior authorization admission review request and required clinical information to Qualis Health to review for medical necessity.

Information Needed for the Review—Qualis Health representatives will collect all information required for clinical reviews. Please see Appendix H, Exhibit 7 of this manual for the Admission Review Questionnaire and Appendix H, Exhibit 8 of this manual for the Continued Stay Review Questionnaire. Both questionnaires are located on the Qualis Health website at: http://www.qualishealth.org/healthcare-professionals/alaska-medicaid-behavioral-health/provider-resources

• Recipient name
• Recipient birth date and age
• Complete recipient address
• Sex of recipient
• Recipient Medicaid ID number
• Admitting diagnosis codes (ICD-10 code)
• Physician name, address, and phone number
• Physician Medicaid provider number
• Facility name, address and phone number
• Facility Medicaid provider number
• Type of review requested
• Verification of Certificate Of Need(CON)[see sample form in Exhibit 10]
• Source of referral
• Primary and secondary reason for treatment
• Prognosis
• Ethnicity
• Admit date
• Adoption
• Name of guardian parent, adoptive parent, or social worker
• Current custody status
• Region of home community
• Living situation
• Previous treatment history
• Level of cognitive functioning
• Individualized Education Plan (IEP)
• Level of intellectual function (including IQ)
• Trauma history
• Date of last Mental Status Exam (MSE)
• Certification of person who performed or supervised MSE
• Current outpatient provider(s) prior to admit
• Risk factors
• Sex offender
• Co-Morbidity
• Plan of Care to include treatment proposed/provided
• Verification of Plan of Care being formulated in consultation with recipient (and guardian(when a minor), Physician, RN, and for PRTF LCSW )
• Diagnostic evaluation
• Justification for the hospitalization and precipitating event
• Anticipated discharge date
• Brief psychosocial history
• Medication history
• Safety precautions in place
• Discharge planning details to include placement (provider)

**Timeframes for submission of Prior Authorization Reviews**

• Acute care admissions – on the day of admission or one day before.
• In-State PRTF admissions – on the day of admission, or up to two business days before the anticipated admission. If transportation needs arise, reviews may be submitted no earlier than five business days prior to the anticipated admission date.
• Out-of-State PRTF admissions – Up to five business days prior to the anticipated calendar date.

---

Revised October 2015
Timeframes for Pended Reviews
When a review has been submitted and is pended awaiting clinical/required information, Qualis Health will notify the provider via web-based review system and/or phone. The provider has no more than five business days to submit the requested information before Qualis Health will proceed with the information already submitted. This may result in an adverse determination due to lack of documentation to support the certification of the review.

Medical Necessity Review Process
During the prior authorization review, Qualis Health’s clinical reviewer will review the medical record and evaluate the medical necessity for admission at the requested level of care. See Appendices B, C and H for more information regarding requirements for medical necessity reviews. If the Alaska State Medicaid Program Medical Necessity Criteria and review protocols are met, the Qualis Health clinical reviewer will issue a Prior Authorization number and the review will be certified (authorized for payment). Please refer to the process and procedures outlined in Section 8 of this manual.

Transfer (Admission) Reviews
Medical transfers require a separate admission review to be completed from the receiving provider and a discharge from the referring facility. This includes inter-facility transfers, such as discharge from one level of care to another as well as discharges to different facilities. Thus, each facility will have a unique Prior Authorization number to use on their claim form. The following special considerations apply:

- If the recipient is not admitted to the transferring facility as an inpatient, the receiving facility does not need to obtain pre-certification, as this is not considered a transfer for review purposes.
- All transfers from one inpatient setting to another require a prior authorization admission review with the receiving facility. Transfers will be evaluated to ensure that the recipient continues to meet severity of illness and intensity of service criteria for that level of care.

Both emergency and non-emergency transfers of service require a discharge followed by a new admission review and prior authorization number. Before authorization, a physician, or other qualified healthcare worker must medically evaluate the recipient. Some of the situations that require transfer of a recipient are:

- Transferring treatment from a medical facility to an acute psychiatric facility (e.g., moving a recipient after hospitalization for a medical procedure that leads to diagnosis of a psychiatric disorder of such a serious nature as to require acute inpatient psychiatric services).
Transferring from a medical service to a psychiatric service within the same facility (e.g., moving a recipient to a psychiatric service after hospitalization for self-inflicted injuries).

Transferring from one level of care to another (e.g., moving a recipient from acute to PRTF care) requires a discharge from the one level of care and a new PA Review before admission to the other level of care.

Transferring from one facility to another facility with the same level of care, i.e., to access services that are:
- More specialized
- More or less secure or structured, or
- Closer to home to receive services which cannot be delivered at a less restrictive level of care in the state of Alaska

Eligibility Established During an Acute Inpatient Admission
When eligibility is established after admission to a facility, the facility will submit clinical information for the entire length of stay in the initial review following the procedures noted below. The submission of the review from the facility needs to be timely—i.e. within a few days of notification that recipient is Medicaid eligible. The date of eligibility notification must be documented in the review notes and the review is to be performed in the following manner:

- Perform the admissions/initial review in the web-based review system (preferred method)—use the Admissions Review Questionnaire, and include the Plan of Care Review (see Plan of Care Questions in the Continued Stay Review Questionnaire); furthermore,
- As required in the Qualis Health questionnaire, information for the master plan of care review must be submitted in clinical findings as opposed to entering it into the Continued Stay questionnaire; and
- Information for the continued stay must be submitted in seven day increments for acute in-patient treatment, and one month increments for residential psychiatric treatment, answering the questions in the Continued Stay Review Questionnaire, to the current date.

Partial approvals may occur within the timeframe of more lengthy reviews.
This page intentionally left blank
Section 10–Continued Stay (Concurrent) Utilization Reviews

Purpose
The purpose of the continued stay review process is to evaluate whether the patient requires an extension of inpatient services and meets medical necessity. During the continued stay review, the Qualis Health clinical reviewer evaluates what services have already been provided to the patient and the plan for continuing in-patient treatment. Providers should submit reviews in a timely manner.

A continued stay (concurrent) review takes place during the time in which a recipient is receiving inpatient treatment at the acute care or residential care facility. If the first review was submitted before the recipient discharged from the facility, the subsequent reviews will be considered continued stay reviews through the patient’s discharge date.

Responsibility
Providers are responsible for obtaining certification for continued stays from Qualis Health. The clinical reviewer will receive all of the appropriate detailed clinical information for the requested review period to satisfy Alaska State Medicaid Program Medical Necessity Criteria and review protocols before the continued stay review will be certified. Provider is responsible to assure that the information submitted in the review is accurate for the time frame of the review and documented in medical record of chart.

Requirements
The psychiatric evaluation must document a primary Behavioral ICD-10 Diagnosis Code (s) (Mental, Behavioral, and Neurodevelopmental Disorders (F01-F99) excluding any form of substance abuse disorder, intellectual disability, or developmental disorder. Diagnosis and/or treatment for a substance abuse disorder must be secondary to diagnosis and/or treatment for the mental health disorder in order to seek authorization for services. For neurodevelopmental disorders there must be documented evidence that the individual has the ability to continue to benefit from PRTF services that would enable them to self-regulate behavior, modulate emotional reactivity, and improve developmentally appropriate functioning in major life domains.

Process and Procedures
The provider will submit the continued stay review request to Qualis Health via web-based system (preferred method), phone, fax, or mail. Please refer to Section 7 and 8 of this manual for methods of and processes for submission. Refer to Appendix H, Exhibit 8 for a copy of the Continued Stay and Master Plan of Care Questionnaires.

Information Needed for the Review
The Continued Stay Review Questionnaires collect the basic information needed by Qualis Health representatives to complete the review. See Appendix H, Exhibit 8
for a copy of the questionnaire.

The clinical reviewer will review the medical record and evaluate the necessity of admission, appropriateness of service, and continued need for placement at the current level of care. During the review, the following types of information will be considered:

- Diagnostic evaluation that includes examination of the medical, psychological, social, behavioral and developmental aspects of the recipient’s situation and reflects the need for inpatient psychiatric care.
- Current acuity or behavioral issues that support the need for continued care at the current level of care
- Appropriateness of diagnostics, therapies, procedures, and other services
- Complications, if any
- Quality of care
- Length of stay
- Discharge planning progress and needs

Should discharge planning issues be identified, the clinical reviewer may make a referral to the medical director for peer clinical review and potential discussion with the attending physician. For out-of-state PRTF reviews, referral to the Care Coordinator will occur to assist with the discharge planning process. Additionally, the State of Alaska Behavioral Health Utilization Review team will be included in clinical discussion to assist with this process.

If the submitted documentation supports the Alaska State Medicaid Program Medical Necessity Criteria and review protocols, the clinical reviewer will approve the continued stay and assign a next review date.

**Continued Stay Review Process**—Once the information for the review has been received, the Qualis Health clinical reviewer will assess the documentation submitted using Alaska State Medicaid Program Medical Necessity Criteria and review protocols to determine whether the condition of the recipient meets criteria for the level of care and the type of services requested. See Appendices E and H for more information regarding requirements for medical necessity reviews. If the Alaska State Medicaid Program Medical Necessity Criteria and review protocols are met, the review will be certified (authorized for payment). Refer to the process and procedures outlined in Section 8 of this manual.

Once the provider has initiated a continued stay review with Qualis Health, the review process will continue until one of the following occurs:

- The recipient is discharged, upon which the facility will place the actual discharge date and updated discharge information in web-based review system or by phone or fax.
- Continued stay (concurrent) review is non-certified by Qualis Health
- The recipient loses Medicaid eligibility
• The recipient becomes eligible for Medicare Part A after admission

During the prior authorization review, the next review date is set for continued stay review. Qualis Health will establish the date when a concurrent review will be due if the recipient has not been discharged before this date. Providers are responsible for submitting current information for continued stay review if the client has not discharged. Providers are to contact Qualis Health and submit the next continued stay review within the following timeframes

**Timeframes for Continued Stay Review Submissions**

- Acute Inpatient Master Plan of Care Review (second review) and Continued Stay Reviews should be submitted on (or no more than two days prior to) the assigned next review date.
- PRTF Master Plan of Care (due 14 days following admit), Continued Stay and Therapeutic Transition Day reviews may be submitted up to three days prior to the assigned next review date.
- Specific questions for each type of Continued Stay Review (Master Plan of Care, Continued Stay and PRTF TTD) are found in the Continued Stay Review Questionnaire.

**Timeframes for Pended Reviews**

When a review has been submitted and is pended awaiting clinical/required information, Qualis Health will notify the provider via Qualis Health Provider Portal and/or phone. The provider has no more than seven calendar days to submit the requested information before Qualis Health will proceed with the information already submitted. This may result in an adverse determination due to lack of documentation to support the certification of the review.

**Therapeutic Transition Days (TTD)**

A calendar day related to a hospitalization in a PRTF that is authorized by Alaska Behavioral Health for payment of services for a recipient who has not yet reached their 22 birthday and who has been stabilized and therefore is ready for transition or discharge 7AAC 150.990 (40). Therapeutic Transition Days (TTD) are designed to allow Psychiatric Residential Treatment Facility (PRTF) health providers to continue delivering care and receiving certification for services while facilitating difficult discharge plans that include movement to a less intense level of care. Qualis Health reviewers will identify and track patients who are candidates for the Therapeutic Transition Days. The facility may contact Qualis Health Care Coordinators for assistance in facilitating discharge plans in particularly difficult cases for those youth in TTD status. If the recipient is not discharged within 60 days of being placed in TTD, the provider may contact the State of Alaska Division of Behavioral Health to request additional TTD days. The purpose of TTD is to allow additional time for appropriate discharge planning in difficult cases.
Review Process for TTD

- Provider contacts Qualis Health for a continued stay review.
- Qualis Health reviewers may determine that the recipient appears to be nearing completion of their treatment objectives in the PRTF setting. The reviewer will notify the provider of the impending TTD status and recommend to the provider that **TTD status may be considered for the next review requested.**
- Upon request of the next review, if TTD status appears appropriate, the reviewer will confirm with the provider that they accept TTD status. Qualis Health reviewers will use TTD criteria to certify TTD status for the review.
- Qualis Health will continue to perform reviews during the TTD of treatment to monitor discharge planning efforts.
- If the provider does not wish to use TTD status, the review will proceed by applying the PRTF criteria and may be referred to the Qualis Health physician for review.
- The usual appeal process is available should decertification of the continued stay occur. (See Section 16)

**TTD Criteria**—to certify for TTD, the following conditions must be met:

- Symptoms exhibited by recipient as documented by provider indicate that psychiatric treatment for admitting symptoms and behaviors is no longer expected to either improve recipient’s condition or prevent regression of symptoms.
- Available information from the provider indicates that the symptoms of the primary diagnosed psychiatric disorders (ICD-10 Code) exhibited by recipient and treated upon admission have stabilized.
- Available information from the provider indicates the identified residual chronic symptoms are unlikely to improve significantly with more intensive or aggressive residential psychiatric treatment services.

**Indicators to Certify TTD**

- There are no current suicidal or homicidal ideations or self-injurious behaviors.
- Incidences involving impulsivity, assaultive behavior, self-mutilation, serious physical destructive acts, or other similar problem behaviors are documented as reduced or as not ameliorable to further improvement at the level of care and within a reasonable period of time.
- Deficits in psychosocial functioning or in self-care are documented as improved by residential psychiatric treatment or as not ameliorable to further improvement by such treatment within a reasonable period of time.
- The treatment for the admitting behaviors/symptoms has addressed the acuity and symptomatic behaviors and the recipient can now be treated in a less restrictive level of care.
- Required medication management has succeeded to the point the recipient can be treated in a less restrictive level of care.
- Psychotic symptoms, including thought disorders and perceptual disturbances, have been addressed and are abated by treatment and treatment can now be
carried out in a less restrictive level of care.

- Discharge planning, including placement needs, has become the focus of care of the inpatient interdisciplinary team, as the treatment for the psychiatric symptoms causing admission have been addressed.
This page intentionally left blank
Section 11–Retrospective Reviews

Definition and Purpose
A retrospective review for medical necessity is indicated after services have been rendered and after client has been discharged. If discharge has not yet occurred; or if an initial admission review was submitted prior to the patient’s actual discharge, the review will be conducted according to the concurrent review format. Please follow the process for Eligibility Established during an Inpatient Admissions described in Section 8 of this manual.

Providers are required to submit the request for a retrospective review within the allotted timeframe of 12 months after discharge. For eligibility issues, providers must submit retrospective review within the 12 months plus 30 days of determination of recipient Medicaid eligibility. Retrospective reviews submitted in excess of 12 months after discharge are subject to consideration by the State of Alaska Division of Behavioral Health before the review can proceed. Provider is responsible to assure that the information submitted in the review is accurate for the time frame of the review and documented in medical record of chart.

Process for Submitting a Request for a Retrospective Review
The provider must send to Qualis Health the Late Submission/Retrospective Review Request Form in Appendix H, Exhibit 11 of this manual, stating the reason for the request for a retrospective review. Qualis Health will then send a determination regarding the request to submit a retrospective review by the end of the next business day. Once the request is approved, the provider may submit the retrospective review.

Methods for Submitting Retrospective Reviews Once Approval for Submission Has Been Attained
The provider will submit the retrospective review to Qualis Health via web-based review system, phone, fax, or mail. Please see Section 7 of this manual for more information about methods of submitting reviews.

Web-based submission is the preferred method for submitting all reviews.

Submitting Retrospective Reviews Via Web-based Review System
All requests for retrospective reviews will be initiated by the provider. Providers should include sufficient information for the clinical reviewer to complete the review. The entire review may be submitted into the web-based system in seven day (one week) increments.

Submit the following in one week increments:
• Completed Admission Questionnaire
• Plan of care review questions from the Continued Stay Questionnaire (this may be filled out in the Clinical Findings section).
• The questions for the Continued Stay Reviews
Document the following information in the Communication field:
  - Contact name and phone number
  - Type of review: Retrospective review
  - Admit and discharge date and complete discharge information
  - Statement: Medicaid eligibility verified

**Medical Necessity Screening**—The Qualis Health clinical reviewer will review the information provided for the retrospective review and will apply Alaska State Medicaid Program Medical Necessity Criteria and review protocols. If the Alaska State Medicaid Program Medical Necessity Criteria and review protocols are met, Qualis Health will issue a retrospective certification number. Qualis Health certification indicates that the admission was medically necessary. The fiscal agent will be notified via electronic data transfer of the determination.

**Second-level Peer Reviews are not available for Retrospective Reviews**

**Non-certifications**—If the Qualis Health physician reviewer non-certifies the request for payment authorization, the determination status will immediately be posted in the web-based review system and a non-certification letter will be mailed out by the end of the next business day to the following parties: the guardian or parents of recipient (if a minor), the recipient (if an adult), the attending physician, the facility, and State of Alaska Behavioral Health.

The non-certification letters will contain justification for the non-certification and an explanation of the right to request an appeal of Qualis Health’s initial non-certification determination. Refer to Section 16 and Appendix H, Exhibits 3 and 4 of this manual for a detailed description of the appeal procedure.

The Alaska Department of Health and Social Services will not reimburse providers for services that have been non-certified by Qualis Health, with the exception of non-certifications that are reversed as a result of an appeal review by Qualis Health or a provider appeal or recipient Fair Hearing by the State.
Section 12—Leave of Absences

 Approved Leave of Absence
 An approved leave of absence (LOA) is an absence in which the treatment team of the facility has established that the purpose is to further the treatment goals. It is expected that the approved leave of absence is part of the treatment/discharge planning; i.e., is for clinically appropriate reasons (based on the Medicaid payment protocols and criteria). These leaves will be reported in the normal continued stay review process, and must be documented in the chart. If the recipient is absent for more than 12 days in a calendar year, a form requesting the additional LOA days must be submitted through Alaska Division of Behavioral Health (see Example Appendix H, Exhibit 13).

 Unapproved Leave of Absence
 If the recipient leaves without permission from a facility and returns within 72 hours, then no action between Qualis Health and the facility is required. If a recipient leaves and returns after 72 hours, then Qualis Health will consider the absence a discharge that began on the date the recipient left the facility. When a facility holds a bed for the return of a recipient so he/she could return and complete his/her treatment program, the facility must submit a discharge notification to Qualis Health, and a re-admission to the treatment program, as required by the Alaska State Medicaid program. It is the facility’s responsibility to notify Qualis Health of the absence and to request re-admission review as required.

 Admission to a different facility
 If the recipient is admitted to a different facility (i.e. hospital, acute inpatient psychiatric care, lateral transfer), Qualis Health will consider the absence a discharge that began on the date the recipient left the facility. It is the facility’s responsibility to notify Qualis Health to obtain a new prior authorization admission review.

 Incarceration of a Youth
 If the recipient is incarcerated, the absence is considered a discharge that began on the date the recipient left the facility. It is the facility’s responsibility to notify Qualis Health and obtain a new prior authorization admission review if the client returns to the facility.
Psychiatric Residential Treatment Facilities Therapeutic Leave of Absence Policy

Psychiatric Residential Treatment Facilities (PRTFs) will receive payment for days that recipients are on a Therapeutic Leave of Absence (LOA). The purpose of a therapeutic LOA is to facilitate successful transitions from an inpatient residential setting to a less restrictive or to community based behavioral health services upon discharge. Examples of therapeutic LOAs include:

- Therapeutic home passes for the recipient at the family home, foster home, or other less restrictive residential or outpatient treatment options
- Overnight leave with family in conjunction with onsite family treatment at the PRTF

Coverage

In order to qualify for reimbursement, therapeutic LOAs must be planned and requested at least 14 days in advance of travel and documented as medically necessary (to further treatment goals and increase successful transitions) in the recipient’s medical record.

Clinical documentation providing support for therapeutic LOAs must include:

- a crisis plan that identifies behavioral health services provider/s that will support and facilitate treatment should a crisis occur (contact person name, credentials, phone number)
- goals and objectives of the therapeutic LOA; and documentation of previous LOA’s and
- how the therapeutic pass will assist the youth and family in achieving treatment objectives
- departure and return dates

In addition to the above, clinical documentation for therapeutic LOAs for the purpose of a therapeutic home pass must include:

- appointment/s with the identified community-based provider/s of behavioral health services and/or residential services
- appointment with the youth’s school is highly recommended

Coverage of up to 12 therapeutic LOA days per calendar year will be reimbursed without prior approval. Additional days require prior approval from the Division of Behavioral Health.
When requesting approval of therapeutic LOA days beyond the 12-day service limitation, please complete the *PRTF Leave of Absence Request Form* Appendix H Exhibit 13 and submit required clinical documentation as specified on the form to:

**Division of Behavioral Health**

3601 C Street, Suite 934  
Anchorage, AK 99503  
Attention: Clinical Staff  
FAX: (907) 269-8166

**Billing/Reimbursement**

Billing for therapeutic LOA days requires a specific revenue code, corresponding units, and charges as follows:
- Accommodation revenue code 0183 is designated for “Therapeutic Leave”
- Number of units billed needs to correspond with the number of total days for “Therapeutic Leave”
- Total charges needs to correspond to the daily rate (per diem) multiplied by the number of days (units)

Billing for non-covered LOA (patient convenience, non-therapeutic, non-approved) requires the PRTF to utilize a different revenue code, corresponding units, and charges as follows:

- Accommodation revenue code 0189 is designated for “Other” LOA
- Number of units billed needs to correspond with the number of total days for non-covered “Other” LOA
- Total charges needs to correspond to the daily rate (per diem) multiplied by the number of non-covered leave days (units)

**NOTE**: Therapeutic home passes may result in the patient being discharged from your facility, or otherwise not returning to complete treatment. In these circumstances, the discharge date is the date that the recipient left the facility on the therapeutic leave of absence.
Section 13—Reporting Serious Occurrences and Events

Joint Commission standards define a sentinel event as an unexpected occurrence involving death or serious physical, psychological injury, or the risk thereof. Serious injury specifically includes loss of limb or function. The phrase, "or the risk thereof" includes any process variation for which a recurrence would carry a significant chance of a serious adverse outcome. Such events are called "sentinel" because they signal the need for immediate investigation and response.

It is the provider's responsibility to report all serious occurrences and sentinel events to the State and other authorities as indicated below. This section is included in order to help with the education of providers regarding their responsibilities under the law.

The Code of Federal Regulations (42 CFR 483.374) requires these actions in these situations:

[Part b of this Code] Reporting of serious occurrences: The facility must report each serious occurrence to both the State Medicaid agency and, unless prohibited by State law, the State-designated Protection and Advocacy system. Serious occurrences that must be reported include a resident's death, a serious injury to a resident as defined in Sec. 483.352 of this part, and a resident's suicide attempt. Definition of a serious injury as defined in Sec.483.352 means any significant impairment of the physical condition of the resident as determined by qualified medical personnel. This includes, but is not limited to, burns, lacerations, bone fractures, substantial hematoma, and injuries to internal organs, whether self-inflicted or inflicted by someone else.

[Part c of this Code] Reporting of deaths: In addition to the reporting requirements contained in paragraph (b) of this section, facilities must report the death of any resident to the Centers for Medicare & Medicaid Services (CMS) regional office.

(1) [sic Provider] Staff must report the death of any resident to the CMS regional office by no later than close of business the next business day after the resident's death.

(2) [sic Provider] Staff must document in the resident's record that the death was reported to the CMS regional office.

Reporting Requirements of Providers from the State of Alaska, Department of Health and Social Services, Division of Behavioral Health

• Any death must be reported to the State of Alaska Division of Behavioral Health staff no later than the close of business the next business day after the resident’s death.
• Any incident which requires investigation by an investigating body is to be reported to the State of Alaska Division of Behavioral Health staff no later than the close of business the next business day.
• Providers are to report these occurrences to any of the State of Alaska Division of Behavioral Health staff at (907) 269-3600.

Alaska Behavioral Health’s Clarification of Providers’ Reporting Requirements

It is also the provider’s responsibility to report all serious occurrences as indicated below.

**Medical**
- Incidents that require outside medical attention
- Burns
- Lacerations requiring medical attention
- Bone fractures or breaks
- Substantial hematoma
- Injuries to internal organ whether self-inflicted or by someone else

**AWOL (Absent Without Leave)**
- If gone overnight
- If anything significant occurred during the AWOL
  - Police intervention
  - Use of substances
  - Suspected abuse

**Sexual Acting Out/Physical Aggression**
- Any activity or occurrence which must be reported to state Child Protective Service agencies
- Any time an Alaskan youth is the victim or the offender
- Suicidal Attempt or serious suicidal gesture

Providers are to report serious (sentinel) events and occurrences using the form that can be accessed through the link in Appendix H, Exhibit 12. Report these occurrences to the State of Alaska Division of Behavioral Health team members at (907) 269-3600 or via fax at (907) 269-8166. The form is to be filled out completely when submitted to the State of Alaska Division of Behavioral Health.
Section 14–Treatment for Sexual Offenders

Sex Offender Treatment
Basic premises of sex offender treatment include resolving emotional issues associated with the youth’s sexual offenses, increasing awareness of high risk situations and triggers to the youth’s sexual offending, and learning and applying individualized skills to decrease each offender’s unique pattern of abusing others. These premises are essential in successfully treating this specific population. Addressing these issues in treatment is likely to decrease the probability of further offending, and increase the probability that the youth will reach their potential for developing meaningful relationships and live safely with their family and community.

Sexual offenders may exhibit surface compliance in a residential setting. Their behaviors need to be carefully assessed and monitored. In particular, behaviors that tend to be exploitative or demeaning should be addressed in treatment and relapse prevention plans. Daily progress notes and daily review documentation should address these sex offending behaviors. Progress in diminishing their frequency and intensity will be used to determine progress in treatment. The provider will update the plan of care every 30 days including progress in treatment, changes in treatment interventions and whether any new behavioral health problems have been identified. Any unresolved diagnostic conditions to be readdressed every 30 days.

Providers will work with the guardian to arrange for relapse prevention planning and aftercare upon release from the program as part of the resident’s discharge plan.

Providers will clearly document medical necessity for continued treatment as outlined in the review process. Much of this documentation will require communicating progress made in accomplishing the goals and objectives identified in the treatment plan.
Section 15—Onsite Reviews and Seclusion & Restraint Standards

Overview Potential Quality of Care Concerns
Qualis Health is committed to promoting optimum quality of care for all recipients and will therefore assess quality of care in various settings while performing reviews. The facility and attending physician are responsible for delivering the utmost quality of care for their patients. The Qualis Health clinical reviewer is responsible for identifying potential quality of care concerns regarding State of Alaska Division of Behavioral Health Medicaid recipients. Potential quality of care concerns may be identified during all types of reviews, including retrospective chart reviews.

If a Qualis Health Representative determines that the recipient’s quality of care is currently or potentially being compromised, a Qualis Health physician will be consulted. If the Qualis Health physician concurs that there is a potential quality of care concern, Qualis Health will refer the case to the State of Alaska Division of Behavioral Health for further action.

On Site Review Standards

Site review/Site Visit: The Code of Federal Regulations (42 CFR 452.606) requires the State of Alaska to inspect PRTFs annually if they are currently providing services for an Alaska Medicaid Recipient. This site visit requires personal contact with the recipient and review of the records to ensure the health needs and the rehabilitative and social services are met for each recipient. The site visit team will consist of at least a mental health clinician and RN. This team may include members of Behavioral Health, Office of Children’s Services, and Division of Juvenile Justice. Additionally, 42 CFR 456.607 states there may only be 48 hours or less of notification before the site visit. See Appendix H Exhibit 14

Restraint and Seclusion Standards

The Facility’s policy and procedures regarding Restraint and Seclusion (R&S) will be reviewed to ensure compliance with the Code of Federal Regulations 42 CFR 483.350 through 42 CFR 483.376 during site reviews. Also, all incidents of R&S documented in Alaska Medicaid recipients’ charts will be reviewed for CFR compliance. See Appendix H, Exhibit 15 for R&S regulations Behavioral Health will use during the site reviews.
This page intentionally left blank
Section 16—Utilization Review Appeals

Overview
Qualis Health offers an appeal process in all cases involving an adverse determination. When a review determination is to non-certify a review request, Qualis Health will generate written notification of the adverse decision within one business day of the date the decision is made. Qualis Health’s non-certification notification will include rights for an appeal review. Qualis Health’s appeal process features a second opinion by a physician who specializes in the services under review. URAC requires that appeal reviews be conducted by individuals who:

- Are clinical peers
- Hold an active, unrestricted license to practice medicine or a health profession
- Are board-certified by the American Board of Psychiatry
- Are in the same profession and in a similar specialty as typically manages the psychiatric condition
- Are neither the individual who made the original non-certification nor the subordinate of such an individual
- Have no conflicts of interest with the patient, attending physician, or facility being reviewed.

There are two types of appeals potentially available—expedited or standard. Instructions on how to initiate each type of appeal are included in the non-certification letter Qualis Health sends when the adverse determination is made.

Expedited Appeals
Definition
An expedited appeal is an appeal of a non-certification in a case involving urgent care.

Process and Procedures
A request for an expedited appeal may be made by telephone, fax, or mail within two business days of the date that appears at the top of the Non-Certification Letter if the recipient has not yet been discharged. If an expedited appeal request is filed after two business days, Qualis Health will respond to that request through the standard appeal process.

Requests for expedited appeals should be directed as follows:

<table>
<thead>
<tr>
<th>How to Request an Expedited Appeal</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Call</strong></td>
</tr>
<tr>
<td><strong>Fax</strong></td>
</tr>
<tr>
<td><strong>Write</strong></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>
Upon receipt of the request for an expedited appeal, the following will occur:

- Qualis Health will notify all appropriate parties of the request.
- Qualis Health will, if needed, request that any additional medical information necessary for the appeal review be submitted to us within two hours.
- The case will be referred to a Qualis Health physician reviewer who is licensed and/or accredited in the appropriate specialty or subspecialty who is not the same individual who initially reviewed and non-certified the review.
- The physician reviewer will review the medical information.
- If the physician reviewer reverses the non-certification decision, the Qualis Health representative will issue a certification number and length of stay (if applicable) and will notify all appropriate parties telephonically and in writing.
- If the physician reviewer modifies the decision or upholds the non-certification, the requesting physician or facility will be notified telephonically and in writing.
- The Department of Health and Social Service’s MMIS will be updated electronically accordingly if decision is either reversed or modified.
- Notification with the review outcome, including clinical rationale will be sent to the recipient, attending physician, and facility.

If the recipient, attending physician, or facility disagrees with the expedited outcome, a standard appeal may be filed.

**Standard Appeal**

**Definition**

A standard appeal is an appeal of a non-certification. It is not an expedited appeal. In most cases, standard appeals will not relate to cases involving urgent care. However, standard appeals may also include secondary appeals.

**Process and Procedures**

A request for a standard appeal may be made by telephone, fax, or mail within 180 days of the date shown on the non-certification notice. Requests for standard appeals should be directed as follows:

<table>
<thead>
<tr>
<th>How to Request a Standard Appeal</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Call</strong></td>
</tr>
<tr>
<td><strong>Fax</strong></td>
</tr>
<tr>
<td><strong>Write</strong></td>
</tr>
</tbody>
</table>

Any request for appeal of a non-certification will be reviewed by a Qualis Health physician/practitioner consultant licensed and/or accredited in the appropriate
specialty or subspecialty as the attending physician, but will not be the same individual(s) who initially non-certified the review or the expedited appeal, if applicable.

Qualis Health will issue the appeal decision within 30 days of receipt of the request for a standard appeal. All appropriate parties will be notified in writing of Qualis Health’s determination to uphold, reverse, or modify the initial non-certification decision.

Qualis Health’s appeal decision will take precedence over the initial non-certification decision or the expedited appeal decision, if applicable. For example, if the appeal review certifies more facility days than the original review, then more facility days will be recommended for certification. (See Exhibit 4).

Department of Health and Social Services Appeal Procedure
Fair Hearing Rights for Recipients
The Department of Health and Social Services Fair Hearing procedure is the process by which recipients can contest the Qualis Health non-certification decision. Recipients may request a fair hearing by phone or in writing to the Fair Hearing representative at Alaska Department of Health and Social Services, within 30 days of the date of the Qualis Health’s standard appeal determination letter non-certifying the service. The request must state the rationale for requesting a Fair Hearing. The address and phone number to request a fair hearing:

Attn: Fair Hearing Representative
Xerox, Inc.
1835 S. Bragaw Street, Suite 200
Anchorage, AK 99508
(907) 644-6800

If the recipient has been getting a service paid by Alaska Department of Health and Social Services that is stopped, suspended, or reduced by an action Qualis Health takes, the recipient may ask that the service be continued. If the recipient wants to have the service continued while awaiting a hearing decision, he/she should ask for a continuation of the service within 10 days of the date of the action to stop, suspend, or reduce the service. If the recipient asks for the service to be continued and the hearing decision determines that the Alaska Department of Health and Social Services was correct to stop, suspend, or reduce the service, the State may require the recipient to repay the cost of the services provided. (Regulatory References: 42 CFR 431.230(b) and 7 AAC 49.200).
**Second Level Appeal Rights for Providers**

An additional appeal process is available to providers through the Alaska Department of Health and Social Services. A provider may request a second level appeal when they are not satisfied with the results of the first level appeal decision by Qualis Health. A second level appeal must be requested in writing and postmarked within 60 days of the date of the first-level appeal decision by Qualis Health. A telephone call does not serve as notification that a second level appeal is being requested.

Providers should submit second level appeals to:

**Division of Behavioral Health**  
**Claims Appeal Section**  
**3601 C Street Suite 878**  
**Anchorage, AK  99503**

Include a copy of the Qualis Health first level decision and supporting documentation considered relevant with the written appeal request.

Providers will be notified in writing of the final decision by the Alaska Department of Health and Social Services. If the recipient has been getting a service paid by the Alaska Department of Health and Social Services that is stopped, suspended, or reduced by an action Qualis Health takes, the recipient may ask that the service be continued. If the recipient wants to have the service continued during the time awaiting an appeal decision, he/she should ask for a continuation of the service within 10 days of the date of the action to stop, suspend, or to reduce the service. If the recipient asks for the service to be continued and the appeal decision determines that the Alaska Department of Health and Social Services was correct to stop, suspend, or reduce the service, the state may require the recipient to repay the cost of the services provided. *(Regulatory References: 42 CFR 431.230(b), 42 CFR 431.231(a), 7 AAC 49.190 and 7 AAC 49.200)*
Section 17 - Care Coordination

Overview
The scope of Care Coordination extends to Children (up to age 21 years) who are covered by Alaska Medicaid and receiving services in a residential psychiatric treatment center both in Alaska and out-of-state. Care Coordination may extend to children who are at risk for admission to residential or inpatient psychiatric levels of care if determined by the State.

Care Coordination Provided by Qualis Health is a process that links youth (in residential psychiatric treatment) and their providers to services and resources in a coordinated effort that maximizes the potential of youth and provides them with optimal behavioral healthcare upon discharge.

Care Coordinators will network with the out-of-state and in state providers, with Qualis Health clinical review staff, and consult with the State of Alaska Behavioral Health Utilization Review team.

Goals of Care Coordination services:
- Facilitate access to community resources
- Assess family resources and needs
- Identify barriers to lower level of care services
- Promote continuity of care
- Track length of stay in Psychiatric Residential Treatment Facilities
- Track and post on website available beds and services
- Share information with providers and families to facilitate a smooth transition of their clients to community based services within Alaska.

Care coordination involves monitoring treatment progress, conducting family assessments, tracking length of stay, and facilitating and sharing information to assist the providers in their discharge planning processes across the continuum of care.

Family Resource Needs Assessment
Care Coordinators will contact parent or guardian 30 to 60 days after admission/placement in residential treatment facility. They will collect information from the family or guardians including but not limited to: former providers, family concerns, barriers to services, needs for additional case management, and family education. In additions, care coordinators will share information specific to the family/patient through consultation with residential treatment program staff (therapists, case managers, etc.,) to facilitate transitions or discharge.

Care Coordinators will share information with the family and providers through provision of a list of resources and options for planning for continued treatment.
Family Discharge Readiness Assessment
Care Coordinators will reconfirm agreement by the family to the plan for continuity of care services and their readiness to implement the family’s (guardian’s) portion of the discharge plan prior to discharge through conducting a Family Discharge Readiness Assessment. Care Coordinators will share information specific to the family/patient through consultation with residential treatment program staff (therapists, case managers, discharge planners, etc.) to facilitate transition or discharge and make them aware of other services/provider options that are supported by the family (guardian).

Discharge Planning across the Continuum of Care
The continuum of care is the range of health, social, and human services, treatments, and resources offered in a variety of settings that provide appropriate services to meet the patients’ needs.

Availability of Services within Alaska
Recipients with mental health issues have several different settings and levels of care options within Alaska. The Care Coordinators will assist the providers to know what is available in Alaska as close to the home region of the recipients as possible. Qualis Health’s website at http://www.qualishealth.org/healthcare-professionals/alaska-medicaid-behavioral-health/provider-resources will be updated daily regarding availability of services in Alaska.

The Care Coordinators will educate and support providers regarding the range and levels of care for behavioral health services that are appropriate for each youth in Alaska based on family assessment. If there are needed services that are not covered by Medicaid, the Care Coordinator may work with the State of Alaska’s Behavioral Health Utilization Review team to identify alternative funding sources that could be disbursed to providers, enabling the recipients with special needs to access those services.

Care Coordinators will work in close communication with the discharge planners of both the PRTFs and the receiving facility/setting of care in Alaska prior to discharge. The Care Coordinators support the discharge planners at the facility and with the outpatient providers through facilitation of communication on discharge placement needs.

The following Discharge Planning Process Outcomes chart describes the four phases of the discharge planning process, the desired outcomes, and the associated activities of the facility’s discharge planners and the Qualis Health Care Coordinators.

During all phases of the discharge planning process, Qualis Health’s Care Coordinators are there to assist and support the discharge planners to address any unnecessary delays and to accomplish a timely and appropriate discharge.
Discharge Planning Process Outcomes

Phase 1–Patient Identification
- **Facility and/or Care Coordination team** identifies incoming patients based on admit or State recommendation
- **Facility** provides Care Coordinators with basic information needed for tracking length of stay, and progress toward meeting discharge goals, family guardian information.
- **Care Coordination team** facilitates information flow between the sending and the receiving facility

Phase 2–Discharge Planning Evaluation & Family Assessment (30 – 60 days after admit)
- **Facility** conducts evaluation of the client’s post-discharge needs, including self-management capabilities and availability of appropriate services and specific providers in identified discharge location
- **Care Coordinator** conducts Family Resource Needs Assessment and supports discharge planning by providing information about available resources in the identified discharge location, available services, information regarding family needs, and potential gaps and or barriers to services.

Phase 3–Reassessment of the Discharge Plan
- **Facility** re-evaluates reported plan with family in light of the client’s progress in treatment and clinical situation, makes corresponding suggestions regarding the discharge plan or service availability to meet the needs of the client as indicated by the treating clinician.
- **Care Coordinator** communicates with the facility to receive any updates to the plan and investigates the availability of any additional services that may be needed (calls facility, confirms needs, and offers assistance to facilitate information exchange between discharging and receiving service provider)

Phase 4–Confirmation and Implementation of the Discharge Plan
- **Facility** finalizes the discharge plan and provides Care Coordinator with the specific providers of services as outlined in the discharge plan, and updated information 30-60 days prior to the anticipated discharge date.
- **Care Coordinator** Conducts Family Discharge Readiness
Assessment, provides feedback regarding any concerns to the provider, and confirms the availability of appropriate services of the viable care transition plan

- **Facility** uses feedback from Care Coordination team to modify or adjust discharge plans to best meet needs of client and family if necessary and provides actual discharge date to Care Coordination team

**Desired Outcomes**

- Work in a collaborative way to bring the youth closer to their home region as soon as appropriate treatment is found to be available and accessible
- Reduced length of stay in residential programs
- Improved continuity of care that meets the individual patient’s needs based on family resources and needed supports
- Improved patient and family satisfaction
- Decrease of readmissions to residential services’

**Tracking Bed Availability and Treatment Programs**

Qualis Health updates and maintains the care coordination website, providing pertinent information on both in-state and out-of-state treatment programs. This site gives information about current availability of inpatient and outpatient resources. **Providers are requested to send information regarding their available beds on a daily basis** to Qualis Health.

To access information on available beds and services, please go to [http://www.qualishealth.org/healthcare-professionals/alaska-medicaid-behavioral-health/provider-resources](http://www.qualishealth.org/healthcare-professionals/alaska-medicaid-behavioral-health/provider-resources) and scroll down to view the *Facility Bed Availability* section.

**Case Consultation with State Officials**

Upon request or on a case-by-case basis, the Care Coordinator provides consultation on information pertaining to the recipient’s discharge planning needs, networking with Department of Health and Social Services, Office of Children’s Services, Division of Juvenile Justice, Division of Senior and Disability Services, and the Behavioral Health Utilization Review team.

**State of Alaska’s Provider/Workgroup Meetings**

The Care Coordinators participate in various meetings with providers in various areas of the state (previously called Bring The Kids Home BTKH Meetings). These meetings are held with various agencies in the state to discuss service availability and the needs of youth transitioning back to Alaska from out of state PRTF facilities. The purpose of these meetings is to identify appropriate resources so youth can be brought closer to their home region as soon as appropriate treatment is found to be available and accessible.
Appendix A - Glossary of Terms and Acronyms
This page is intentionally blank
Appendix A
Glossary of Terms

**Active Treatment:**
Active treatment refers to the planning, delivery, and monitoring of a dynamic set of inter-related, effective, culturally appropriate, and individualized behavioral health services designed to meet the behavioral health service needs of the recipient. Active treatment includes the use of specific and clear intervention strategies that target those behaviors identified in the diagnostic evaluation, individualized POC, and designed to improve functioning, reduce or eliminate negative symptoms, demonstrate ongoing measurable progress, and enhance the quality of the recipient’s life. Qualified team must provide active treatment to a recipient and his/her legal guardian(s).

**Acute Care:** Critical care administered to a patient with a rapid onset acute condition, and following a short but severe course. Examples of acuity may include serious impaired thought processes such as hallucinations, delusions, loose associations, paranoia, or other acute disturbances that put recipient at imminent risk of harm; severely dysfunctional patterns of behavior related to the acute disturbances pertaining to the primary and (if any)secondary diagnoses.

**Adverse Determination:** The services do not meet Medicaid Medical Necessity Criteria or review protocols, so the request for Medicaid authorization is not certified.

**Appeal:** An appeal is a request for reconsideration for a disputed review decision.

**Case ID Number (Request Identification):** A number assigned to the review at the time of submission.

**Certification of Review:** After the provider submits the clinical information for review, the Qualis Health clinical reviewer may authorize, or certify, that medical necessity is met. When the provider receives a “Certification,” then a claim may be submitted to the fiscal agent. Certification is not a guarantee of payment.

**Certification of Need (CON):** A federally mandated, physician-certified document, required for each recipient at the time of admission to inpatient psychiatric services, which declares that inpatient services are, or were, needed upon admission. This evaluation must be completed before the Medicaid agency authorizes care. Recertification must be made at least every 60 days after certification (Code of Federal Regulations – 42 CFR 456.160, and 441.152). However, under 42 CFR Ch. IV 441.155 (b)(c) “The plan must be reviewed every 30 days by the team specified in 441.156 to— (1) Determine that services being provided are or were required on an inpatient basis, and (2) recommend changes in the plan as indicated by the recipient’s overall adjustment as an inpatient.” See form in Appendix H Exhibit 10

**Continued Stay (Concurrent) Review:** The process of reviewing for continued stay medical necessity based on updated clinical and treatment planning documentation furnished by the provider

**Delayed Eligibility:** Review of cases for recipients not eligible at the time of admission
and determined eligible prior to patient’s discharge from facility

**Emergency or Urgent Admission:** An emergency admission is one in which the attending physician believes that there is a likelihood of serious harm to the recipient or others and that the recipient requires both immediate intervention and an immediate or “soon as possible” protective environment. Also see the definition of “Urgent Care Services”.

**End Certification Date:** Services have been authorized for payment through this “next review” date. The provider must submit the next review on a day before the “end certification” or “next review” date.

**Fair Hearing:** The legal forum provided by the State of Alaska for a recipient and/or representative in disagreement with a Qualis Health determination to reduce, non-certify, or suspend authorization.

**Family Psychotherapy:** A form of therapy in which members of a family or individuals sharing a household who are considered “family members” attend psychotherapy sessions for the treatment of relationships within the family or household to achieve better emotional, behavioral, or social adjustments of all the individuals within the family or household.

**Group Psychotherapy:** Group therapy delivered by a mental health professional clinician (7 AAC 43 1990.22)

**Health Insurance Portability and Accountability Act (HIPAA):** Relating to the uses and disclosures of Protected Health Information.

**Inpatient Interdisciplinary team (IIT):** Team comprised of the following members: psychiatrist, clinical social worker, registered nurse who has specialized training or 1 years’ experience, depending on the needs of the client an occupational therapist or psychological associate licensed with a master degree in clinical psychology may be part of the team (7AAC 140.405)

**JIVA:** Internet based software program that allows for review HIPPA compliant web bases utilization review submission and communications.

**Late Submission:** Reviews performed by Qualis Health in cases where the admission review was not submitted or the certification span has expired, the client has not yet discharged, and the provider submits a late request for authorization.

**Leave of Absence Policy (LOA):** Overnight leave from the facility to have been determined to be medically necessary by the treatment team. Up to 12 calendar days per year may be allowed and billed by the facility.

**Medical Necessity:** Refers to the medical necessity of inpatient psychiatric care as based on the Alaska Medicaid Medical Necessity Criteria and as determined by Qualis Health review staff.

**Next Review Date:** The next review date is the date assigned to submit the next
review. Certifications are given from (date) to (next review date). The day before the
next review date is the last date certified for possible payment based on the medical
review.

**Non-certification:** An adverse determination. The services do not meet Medicaid
Medical Necessity Criteria or protocols.

**Onsite Family therapy travel requests:** Travel authorizations for onsite family therapy
are covered when the PRTF determines it is medically necessary and it is written in the
POC. It is covered not more than every 90 days. The travel to onsite family therapy is
for one parent/guardian to attend. For an exception to be made it must be medically
justified with very clear and specific treatment goals, interventions and expectations in
the POC.

**Partial Certification:** A determination that the number of days that meet medical
necessity is different from the days requested by the provider.

**Peer-to-Peer:** A telephone review between the facility physician and Qualis Health
physician reviewer to discuss any information that supports the medical need for the
requested services.

**POC:** Plan of Care/Individualized Treatment Plan; Master Treatment Plan.

**Primary Diagnosis:** The diagnosis of a disorder determined through appropriate
clinical assessments as the chief cause of the admission to a facility for behavioral
health services.

**Prior Authorization (Pre-service) Review:** The process whereby Qualis Health
reviews clinical information from the provider to determine medical necessity for specific
inpatient psychiatric services. A Prior Authorization Number (PA number) is assigned
when the review is certified, and the provider uses this PA number for billing purposes
and for making travel arrangements.

**Provider:** An individual, firm, corporation, association, or institution providing or
approved to provide medical services to an Alaska Department of Health and Social
Services Medicaid recipient.

**Provider Medicaid ID Number:** Number assigned to each provider by Xerox fiscal
agent for Alaska Department of Health Social Services.

**Recipient:** An individual eligible for benefits under the Alaska Department of Health and
Social Services.

**Retroactive Eligibility Review:** Review of cases for recipients not eligible at the time of
admission and determined eligible at a later date.

**Retrospective Review:** Retrospective reviews are submitted and performed when the
eligibility is determined after the recipient has discharged from the facility, or when
extenuating circumstances have prevented the submission of a review before the
recipient was discharged from the facility. A retrospective review is a review for medical necessity after services have been rendered. Retrospective Reviews are reviews that have not yet been submitted as an initial review, and discharge has occurred.

**Urgent care services:** A case is considered to involve urgent care whenever the application of the time periods for making non-urgent care determinations (a) could seriously jeopardize the life or health of the recipient or the ability of the recipient to regain maximum function, or (b) in the opinion of a physician with knowledge of the recipient’s medical condition, would subject the recipient to severe pain that cannot be adequately managed without the care or treatment that is the subject of the case.

**Xerox:** Fiscal agent for the Alaska Department of Health and Social Services performing services related to claims adjudication and prior authorizations for services such as transportation and accommodation.
**Acronyms**

**AAC**: Alaska Administrative Code  
**CC**: Care Coordinator at Qualis Health  
**CFR**: Code of Federal Regulations  
**CMS**: Centers for Medicare & Medicaid Services

Appendix B
Alaska State Medicaid Program Acute Psychiatric Hospitalization Medical Necessity Criteria
This page is intentionally blank.
Appendix B - Alaska State Medicaid Program Acute Care Medical Necessity Criteria

In order to receive Certification, Criteria A, Band C must be met:

**Criterion A**: Ambulatory care resources providing less restrictive levels of care that are available in the community do not meet the treatment needs of the recipient. 42 CFR 441.152(a) & 7AAC 43.552 (C) (2) (A).

To meet this criterion, A1 and A3, or A2 and A3 of the following must be established:

A.1. □ Documentation that the recipient is diagnosed with a primary behavioral ICD-10 Diagnosis Code(s) (Mental, Behavioral, and Neurodevelopmental Disorders (f01-F99): and that the mental illness causes the person to present a likelihood of serious harm (imminent risk) to that person or others within the past week for children and past 48 hours for adults.

For example: Suicidal ideation with a plan; in possession of a weapon with intent to hurt another; a recent episode with intent to do severe bodily harm; making credible threats of harm; recent psychotic episode causing debilitating hallucinations.

OR

A.2. □ Documentation that the youth recipient's condition is severely impaired as a result of mental illness and substantially interferes with or limits the youth's role functioning in family, school, or community activities. For adults, documentation that the recipient's condition is gravely disabled and role functioning is severely impaired as a result of mental illness and substantially interferes with their ability to engage independently in personal care or community living activities and function independently in the role of worker, student, or homemaker. For both adult and youth, the recipient's symptoms and maladaptive behavior are not a result of intellectual, physical, or sensory deficits.

For example: Severe impairment in role functioning due to committing serious acts of destruction in home or classroom; person’s hallucinations, delusions, or disorganized thinking severely impact their ability to meet needs for nutrition, sleep, hygiene, rest or housing.

AND

A.3. □ Documentation that less restrictive levels of care available in the community do not meet the treatment needs of the recipient or that a less intense level of care is unavailable or inaccessible for meeting the treatment needs; and, there is specific documentation showing how services can reasonably be expected to either improve recipient's condition or prevent regression so that the services will no longer be needed.

For example: Community behavioral health services may not provide required 24 hour care; psychiatric services needed may not be available at the frequency needed to
maintain recipient in the community; the plan of care documents treatment goals and interventions that specifically relate to the primary and (if any) secondary diagnoses and identify discharge criteria to the extent the recipient can be treated in the community.

**Criterion B:** Documentation that proper treatment of the recipient’s psychiatric condition requires services on an inpatient basis under the direction of a physician. 42 CFR 441.152b-2 & 7AAC 43.552 (C) (2) (B).

To meet this criterion, ALL of the following must be established:

**EITHER (for BI):**

B.la.☐ The Certificate of Need (CON) for Elective, or NON-EMERGENCY ADMISSIONS: Must be certified with the signature of two (2) members of the Inpatient Interdisciplinary Team (IIT):

☐ A physician member of the IIT; AND

☐ Another member of the IIT have both signed and certified need for admission according to 7AAC43.552 (f) (1,3).

**OR**

B.lb. ☐ The CON Question for EMERGENCY ADMISSIONS: “Has an appropriate physician certified need for hospitalization?”

**AND**

B.2.☐ The psychiatric evaluation documents that the recipient has a primary behavioral ICD-10 Diagnosis Code(s) (Mental, Behavioral, and Neurodevelopmental Disorder (F01-F99). Any treatment for a substance abuse disorder must be secondary to the treatment for the mental health disorder.

In relation to B.2 criterion, please note:

- A seven (7) day maximum allowable limit on payment is placed on the following diagnostic codes if they are primary diagnoses unless documentation supports an imminent risk of serious harm to self or others if discharged; or unless a more specific diagnosis has been documented and included in the Plan of Care:
  - Oppositional Disorder (F91.3)
  - Conduct Disorders (F91.1, 91.2, 91.8, 91.9)

- A fourteen (14) day maximum allowable limit on payment is placed on the following diagnostic codes if they are primary diagnoses unless a more specific diagnosis has been documented and included in the Plan of Care:
  - Depression NOS (F32.8 and 32.9)
  - Unspecified Mental Health Disorder Non-Psychotic (F99)
AND

B.4. □ Documentation that the recipient is currently experiencing acute disturbances related to the Mental, Behavioral, Neurodevelopmental disorders diagnosed in B.2 above.

For example: Impaired thought processes such as hallucinations, delusions, loose associations, paranoia, or other acute disturbances that puts recipient at imminent risk of harm; severely dysfunctional patterns of behavior related to the acute disturbances pertaining to the primary and (if any) secondary diagnoses; recent psychotropic medication changes that put patient at high risk for acute disturbance if not monitored in inpatient setting.

Criterion C: The services can reasonably be expected to improve the recipient's condition or prevent further regression so that acute care services will no longer be needed. 42 CFR 441.155, 441.156 & 7AAC. 43.552(C) (2) (C)

To meet this criterion, ALL of the following must be established:

C.1. □ The diagnostic evaluation includes examination of medical, psychological, social, behavioral, and developmental aspects of the recipient’s situation and reflects the need for acute care.

C.2. □ The individualized Plan of Care clearly documents goals and measurable objectives derived from the diagnostic evaluation.

C.3. □ The individualized Plan of Care is developed by a team of professionals in consultation with the recipient. If the recipient is a youth, his or her parents and/or legal guardians in whose care she or he may be released after discharge are included in this team.

C.4. □ The individualized Plan of Care clearly documents appropriate therapies, activities, and experiences designed to develop the recipient's ability to function independently within their own environment.

C.5. □ The individualized Plan of Care clearly documents a comprehensive discharge plan that is based on treatment goals and objectives to extent inpatient services are no longer necessary or treatment can be completed in the least restrictive environment (or lower level of care), specifies approximate discharge date based on achievement of those stated objectives, post-discharge service needs including any prospective post-discharge service providers and any other provisions necessary for transition to a lesser restrictive environment and adult services. Discharge plans must be continually updated to reflect changes and progress in treatment planning.
This page is intentionally blank.
Appendix C
Alaska State Medicaid Program
Psychiatric Residential Treatment Facility (PRTF)
Medical Necessity Criteria
This page is intentionally blank.
Appendix C - Alaska State Medicaid Program Residential Psychiatric Treatment Center (PRTF) Medical Necessity Criteria

PRTF Care Criteria: The psychiatric evaluation must document a primary Behavioral ICD-10 Diagnosis Code (s) (Mental, Behavioral, and Neurodevelopmental Disorders (F01-F99) excluding any form of substance abuse disorder, intellectual disability, or developmental disorder. Diagnosis and/or treatment for a substance abuse disorder must be secondary to diagnosis and/or treatment for the mental health disorder in order to seek authorization for services. For neurodevelopmental disorders there must be documented evidence that the individual has the ability to benefit from PRTF services that would enable them to self-regulate behavior, modulate emotional reactivity, and improve developmentally appropriate functioning in major life domains.

In order to receive Certification for PRTF admission or continued stay, Criterion A, B, and C must be satisfied (42 CFR 441.152, 7AAC 43.552(C)(2)(A, B, C) & AS Sec. 47.07.032).

Criterion A

A. Ambulatory care resources available in the community do not meet the treatment needs of the recipient. 42 CFR 441.152a-1, 7AAC 43.552(C)(2)(A) & AS Sec. 47.07.032.

Instructions: Criterion A can only be met when all three categories (Accessibility, Treatment Effectiveness, and Severity) are verified.

Category 1: Accessibility

Instructions: One of the following 3 conditions must be present to satisfy this categorical requirement

A.1. A less restrictive level of care within the State of Alaska will not meet the recipient’s treatment needs.

Examples: Family or relative placement, community wraparound services, day or after school treatment, therapeutic foster care, residential or group home.

---

1 Alaska Statute 47.07.032 asserts (a) Alaska Behavioral Health may not grant assistance for inpatient psychiatric services to a person under 21 years of age who is in an out-of-state psychiatric hospital facility or an out-of-state residential psychiatric treatment center unless Alaska Behavioral Health determines that the assistance is for:

(1) Psychiatric hospital services that are consistent with the person's clinical diagnosis and appropriately address the person's needs and that these services are unavailable in the state; or

(2) Residential psychiatric treatment center services that are consistent with the person's clinical diagnosis and appropriately address the person's needs and that these services are unavailable in the state.
A.2. An appropriate, less restrictive level of care within the State of Alaska is unavailable or inaccessible.

Examples: There are no PRTF beds open for admission; PRTF beds open for admission do not meet clinical needs of the recipient.

A.3. Factors related to the recipient’s family or community prevents effective treatment at a less restrictive level of care within the State of Alaska. Examples: Recipient lacks adequate support, family persistently hampers treatment, making treatment ineffective, severe family disruption, or recipient’s behavior persists despite appropriate treatment in a less restrictive level within the State of Alaska.

Category 2: Treatment Effectiveness
Instructions: One of the following 2 conditions must be present to satisfy this categorical requirement.

A.4. Therapeutic services provided (within the State of Alaska) in a less restrictive setting have been tried and found ineffective.

Examples: Clinical documentation supports the need for safety and structure of treatment provided in inpatient setting due to history of running away, compounding medical conditions, and harm to self or others.

A.5. Child has a documented history of multiple admissions to less restrictive therapeutic residential settings within the State of Alaska and has not progressed sufficiently or has regressed.

Examples: Family placements, therapeutic foster care, outpatient clinical and rehabilitative services, residential and group home care.

A.6. For individuals with cognitive impairments or organic brain syndrome, there is documented evidence that the individual has the ability to benefit from Residential Psychiatric treatment services that would enable them to self-regulate behavior, modulate emotional reactivity, and improve developmentally appropriate functioning in major life domains.

Category 3: Severity
Instructions: One of the following 2 conditions must be present to satisfy this categorical requirement.

A.7. Assessment material conducted by a qualified mental health professional clinician, documents the need for active provision of multiple therapies in inpatient setting with 24-hour awake supervision.

A.8. The recipient’s behavioral health disorder may be treated at a less restrictive level of care. However, the recipient suffers one or more complicating concurrent disorders that determine residential psychiatric care medically necessary.

Examples: Multiple conditions of physical and psychiatric natures, eating disorders, severe depression and FASD, Diabetes, HIV and other complicating conditions.
Criterion B

B. Proper treatment of the recipient’s psychiatric condition requires services on an inpatient basis under the direction of a physician. 42 CRF 441.152a-2 & 7AAC 43.552(C)(2)

Instructions: To meet Certification on Criteria B, all 4 of the following requirements must be met:

B1. A “physician” member of the Inpatient Interdisciplinary Team (IIT), according to 7AAC 43.552(f)(1) has certified need for admission; AND

Another member of the IIT according to 7AAC 43.552(f)(3) has certified need for admission.

B2. Must have a primary behavioral ICD-10 Diagnosis Code (s) (Mental, Behavioral, and Neurodevelopmental Disorders (F01-F99) excluding any form of substance abuse disorder, intellectual disability, or developmental disorder. Diagnosis and/or treatment for a substance abuse disorder must be secondary to diagnosis and/or treatment for the mental health disorder in order to see continued authorization for services. For neurodevelopmental disorders there must be documented evidence that the individual has the ability to benefit from PRTF services that would enable them to self-regulate behavior, modulate emotional reactivity, and improve developmentally appropriate functioning in major life domains.

B3. Psychosocial ICD-10 Diagnosis Code (s) (Injury, Poisoning, and Certain Other Consequences of External Causes (T07-T88) and Factors Influencing Health Status and Contact with Health Services (Z00-Z99))

B4. The recipient is currently experiencing severely dysfunctional problems related to the psychiatric disorder diagnosed in B2, as demonstrated in one of the following areas.

B.4.a) Self-Care Deficit

Examples: Refusal to comply with treatment, impaired hygiene skills, refuses medication, persistent and severely depressed mood, self-care deficit may also place recipient in life threatening situations.

B.4.b) Impaired Safety

Examples: Runs away, history of chronic and severe loss of impulse control, repeated aggressive or destructive behavior toward self, others or property, recent suicide or history of in family or peer group, presence of suicidal ideation, gestures, or attempts

B.4.c) Severely impaired role functioning in the family, school or community.

Examples: The family’s situation is not responsive to outpatient interventions,
difficulty performing at grade level, chronically truant, or repeated problems within the community with law enforcement.

Criterion C

C. The services can reasonably be expected to improve the recipient’s condition or prevent further regression so that PRTF services will no longer be needed. 42 CFR 441.155, 441.156 & 7AAC 43.552(C)(2)(C).

Instructions: To meet Certification on Criteria C, all 5 of the following requirements must be met:

C.1. The diagnostic evaluation includes examination of medical, psychological, social, behavioral, and developmental aspects of the recipient’s situation and reflects the need for PRTF care.

C.2. The individualized POC clearly documents goals and measurable objectives derived from the diagnostic evaluation.

C.3. The individualized POC is developed by a team of professionals in consultation with the recipient, his or her parents, and legal guardians in whose care she or he may be released after discharge.

C.4. The individualized POC clearly documents appropriate therapies, activities, and experiences designed to develop the recipient’s ability to function independently in their own environment.

C.5. The individualized POC clearly documents a comprehensive Discharge Plan that is based on completed treatment goals and objectives, specifies approximate discharge date, post-discharge service needs, identified post-discharge service providers to ensure continuity with the recipient’s family, school, and community upon discharge and any other provisions necessary for transition to a lesser restrictive environment. In continued stay cases, the treatment has stabilized the recipient’s behavioral health condition, and the facility and the guardian are diligently pursuing an appropriate lower level of care.
Appendix D
Alaska Medicaid Mental Health Review Requirements Summary Sheet And Definitions
This page is intentionally blank.
Appendix D - Alaska Medicaid Mental Health Review Requirements Summary Sheet and Definitions

Active Treatment
Active treatment refers to the planning, delivery, and monitoring of a dynamic set of inter-related, effective, culturally appropriate, and individualized behavioral health services designed to meet the behavioral health service needs of the recipient. Active treatment includes the use of specific and clear intervention strategies that target those behaviors identified in the diagnostic evaluation, individualized POC, and designed to improve functioning, reduce or eliminate negative symptoms, demonstrate ongoing measurable progress, and enhance the quality of the recipient’s life. Qualified team must provide active treatment to a recipient and his/her legal guardian(s).

Appeal: An appeal is a request for reconsideration for a disputed review decision. Within 180 days of the notification letter.

Certificate of Need (CON): (42 CFR Ch. IV 441.152 and 441.153)
The clinical file must contain documentation per the CFR, which includes for urgent/emergency admissions:
- A physician certifies that the recipient is in need of inpatient services.
- The certification is made at the time of admission, or if an individual applies for Medicaid assistance while in the hospital before the Medicaid agency authorizes payment.

The Certificate of Need (CON) for NON-EMERGENCY ADMISSIONS: Must be certified with the signature of two (2) members of the Inpatient Interdisciplinary Team (IIT):
- a. A physician member of the IIT; AND
- b. Another member of the IIT have both signed and certified need for admission according to 7AAC43.552(f)(1,3). See CON listed in Appendix I Exhibit 10.

Clinical Records
A provider of psychiatric services shall maintain a clinical record of services provided to a recipient. A clinical record must include:
- The Certificate of Need information for inpatient psychiatric services in accordance with CFR 456.60.
- Diagnostic evaluation that includes examination of the medical, psychological, social, behavioral and developmental aspects of the recipient’s situation and reflects the need for inpatient psychiatric care.
- The results of required Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) screenings.
- An individualized Plan of Care (POC).
- Update Plan of Care (POC) reviews.
- Individualized discharge plan to include specific discharge information. Documentation of active discharge planning at time of admission and continually updated to include contacts made, disposition of the contact, efforts to collaborate and coordinate with referring agency, receiving agency, receiving school (to include special education), barriers identified, and any other information effecting discharge planning. The clinical record must document the parent/legal guardian’s active engagement in the discharge process and the
facility’s efforts to contact and engage the parent/guardian in the process when there is no or limited participation.

- Progress notes that document the service provided, the date of the service, duration of service, active interventions provided, the recipient’s response to the intervention, and the recipient’s progress toward identified treatment goals and objectives. The provider of the service must sign each progress note and include his/her professional credentials.

**Family Psychotherapy Requirements:**
Requirements for family psychotherapy for parental custody recipients:

- In Acute Inpatient hospitals, family psychotherapy is required once per week with the identified family.
- In PRTF facilities, family psychotherapy is required once per week with the identified family to include siblings when clinically appropriate.

Requirements for family psychotherapy for state custody recipients—BOTH of the following are required:

- In acute inpatient hospitals, family psychotherapy is required a minimum of once per week with the identified family, when one exists, to include siblings when clinically appropriate.
- In PRTF facilities, family psychotherapy is required once per week with the identified family, when one exists
- AND: Required contacts with State of Alaska representatives of custody youth— once a week to exchange current treatment information and help facilitate discharge planning, whether or not an identified family is involved.

If family psychotherapy is clinically contraindicated:

- If family psychotherapy is contraindicated for a recipient and the clinical justification is documented in the chart, weekly contact with the parents and/or guardians is required, even when there is no family psychotherapy, in order to communicate treatment progress.
- The timeframe for which family psychotherapy is contraindicated must also be documented in the Plan of Care.
- Family psychotherapy is required to resume as soon as clinically indicated.

**Family psychotherapy for Over 18:** If a recipient of inpatient services is 18 years or older, Family Therapy sessions are required as outlined in protocol. A Release of Information must be signed by the recipient and recorded in the clinical record. Exceptions to this requirement must be documented in the clinical record.

**Family, Individual and Group Psychotherapy Documentation and Requirements:** Must be performed on a weekly basis. A chart note must include a goal, an objective and an active intervention identified in the plan of care. The note records the recipient’s response to the intervention and progress. A progress note includes: date, time, duration of service signature and credentials of service provider and meet the following treatment setting specific requirements:

- **Acute Care**
  - Four therapeutic interventions must occur weekly in any combination of the following three types of therapy:
- **Individual therapy** must occur a minimum of one time per week.
- **Group therapy** that is pertinent to the diagnostic needs of the recipient must occur a minimum of one time per week.

- **Family therapy** must occur a minimum of one time per week.
  - If a recipient is in Office of Children’s Services (OCS) or Division of Juvenile Justice (DJJ) custody, contact with the appropriate caseworker must be held one time per week to discuss treatment progress and discharge planning in addition to the required weekly family therapy with the identified family.
  - Medication management/medication administration services to occur as needed.
  - Crisis intervention services to occur as needed.

- **PRTF Care** – to include all of the service requirements listed under Acute Care plus:
  - Family therapy must occur a minimum of one time per week. If a recipient is in Office of Children’s Services (OCS) or Division of Juvenile Justice (DJJ) custody, contact with the appropriate caseworker must be held one time per week to discuss treatment progress and discharge planning in addition to the required weekly family therapy with the identified family.
  - Group Skill Development services, and
  - Individual Skill Development services.

**Initial Plan of Care**
- Due at time of admission
- Diagnosis
- Problem statement related to the diagnosis
- Goals, objectives and interventions
- Must have discharge date, specific discharge providers identified, and special needs which may be needed at discharge.
- Requires signatures of all members of the IIT which included the MD, the RN, the clinical team member according to Alaska regulations, the parent/guardian if under the age of 18 and the client.

**Master Plan of Care (42CFR Ch. IV 441.155 and 7 AAC 140.405):**
- Due to be written, signed, and implemented within 14 days of admission (441.153)
- Due to be submitted (electronic review system (QHPP) preferred) for review on the 14th day after admission, which is the assigned review date (the end-certification) date

**Must Include:**
- Specific Problems relating to diagnoses are identified for treatment
- Measurable Objectives for each problem identified above are specified
- Projected timeframes for achievement of identified problems
- Integrated program of appropriate therapies (services) are listed as they relate to the identified problems and objectives above. Required therapies include group psychotherapy, family therapy, and individual
psychotherapy and include experiences designed to develop the recipient’s ability to function independently in the recipient’s own environment.

- Diagnostic evaluation using primary Behavioral ICD-10 Diagnosis Code(s) (Mental, Behavioral, and Neurodevelopmental Disorders (F01-F99)) excluding any substance abuse disorder, intellectual disability, or developmental disorder. If there is an intellectual or a neurodevelopmental disorder it does not significantly interfere with the child’s ability to participate in one or more life domains at a developmentally appropriate level and within culturally appropriate context.

- Diagnostic evaluation that includes examination of the psychological, social, behavioral developmental aspects of the recipient’s situation, medication management plan, and reflects the need for inpatient psychiatric care

- Diagnostic evaluation of the client’s medical conditions including:
  - Medications
  - Treatments
  - Restorative and rehabilitative services
  - Dietary needs
  - Assessments

- Be formulated in consultation with the recipient and the recipient’s family, guardian, or other individual to whose care or custody the recipient will be released following discharge

- Signatures of the recipient and/or the parent, guardian, or legal custodian, and the treatment team members

- The signed and dated authorization statement of the treating physician or mental health professional required by regulation

- Post discharge plans begin at time of admission and updated during the recipient’s inpatient stay as the recipient’s psychiatric needs change, that specifies the following:
  - The approximate dates for discharge
  - The recipients; anticipated post-discharge service needs
  - The recipient’s identified services providers, and other provisions necessary for the transition to a less restrictive environment
  - Related community services to ensure continuity of care with the recipient’s family, school, and community upon discharge.

- See the Continued Stay Review Questionnaire for more requirements (see updated version) [http://www.qualishealth.org/healthcare-professionals/alaska-medicaid-behavioral-health/provider-resources]

- Plan of Care must be reviewed/updated every 30 days (441.155) by the inpatient interdisciplinary team (IIT) (for regulated IIT makeup, see 441.156)
  - Determined services provided are required on an inpatient basis
  - Recommend changes in the plan as indicated by the recipient as an inpatient

**Medical Necessity Requirements Summary**

A medically necessary behavioral active treatment health service is designed to:
• Assess the nature and extent of the psychiatric disorder and its impact upon the recipient’s ability to meet the demands of daily living, social, occupation, or educational functioning.
• Diagnose the psychiatric disorder
• Treat the psychiatric disorder
• Provide rehabilitation for the psychiatric disorder
• Prevent the relapse or deterioration of the recipient’s condition due to the psychiatric disorder

In making a determination as to whether the proposed services are medically necessary, the Qualis Health reviewer will consider the following:

• Recommendations of the Inpatient Interdisciplinary Team (IIT).
• The recipient’s diagnosis and level of functioning.
• The risk of harm from the recipient to self or other individuals.
• The appropriateness of the level of care and the need for inpatient or residential care.
• Whether interventions target specific symptoms, behavioral, social dysfunction, and are clearly related to the diagnostic evaluation.
• Whether proposed services in the individualized Plan of Care (POC) are consistent with generally accepted treatments and practices for the treatment of the specific symptoms and behavior and/or social dysfunction.
• Whether the recipient and/or legal guardian agree with the IIT regarding the focus of treatment and the POC will address the symptoms, behavioral and social dysfunctions targeted for intervention.
• The extent to which past and/or current treatment has been successful in treating the symptoms, behaviors, and/or social dysfunction.
• The extent to which less restrictive treatment is not available in the State of Alaska.
• The extent to which the units of service requested are no more than are necessary to meet the treatment or rehabilitation needs of the recipient.
• The extent to which the duration of services requested are no more than are necessary to reach the recipient-approved goals outlined in the individualized POC.
• The requested services are reasonably expected to improve the recipient’s condition or prevent regression so that services at the current level of care will no longer be needed.
• The extent to which social functioning is improved through interventions provided as active treatment, targeted toward specific therapeutic goals and objectives and included in the individualized treatment plan.
• The extent to which the discharge plan is related to the accomplishment of goals and objectives with specific information addressing the approximate date for discharge, the recipient’s anticipated post-discharge service needs, the recipient’s identified service providers, and other provisions necessary for the transition to a less restrictive environment.

Payment for services determined not medically necessary under this section is subject to recovery under 7 AC 43.081.

Mental Status Exam upon Admission: The date of the last Mental Status Exam must be within seven (7) days prior to submission of the review and performed by a mental health professional.
**Peer Review:** Completed by the end of the next business day after notification of the Offer of a Peer Review.

**Plan of Care Reviews:** Must be updated every 30 days for PRTF(441.155), and signed by the physician and appropriate treatment team members (7AAC 140.405; 42CFR Ch. IV 441.156 (b)(5)(c); 441.152; 441.153). Required elements to be included, but not limited to, are to include: Comprehensive discharge plan with anticipated discharge date; DSM 5 diagnoses and ICD 10 code(s)Individual psychotherapy, Family psychotherapy, and Group psychotherapy; Identified Problems/Goals to be treated that address the diagnoses, and updated with documented progress toward measurable goals and objectives in all therapies on continued stay reviews; Consultation with recipient and family or guardian completed.

**Retrospective Appeal:** Provider must submit the request for reconsideration on a retrospective review within the allotted timeframe of 180 business days.

**PRTF Statute Requirement:**
Alaska Statute 47.07.032 asserts (a) Alaska Behavioral Health may not grant assistance for inpatient psychiatric services to a person under 21 years of age who is in an out-of-state psychiatric hospital facility or an out-of-state Psychiatric Residential Treatment Facility unless Alaska Behavioral Health determines that the assistance is for:

1. Psychiatric hospital services that are consistent with the person's clinical diagnosis and appropriately address the person's needs and that these services are unavailable in the state; or

2. Psychiatric Residential Treatment Facility services that are consistent with the person's clinical diagnosis and appropriately address the person’s needs and that these services are unavailable in the state.
Appendix E -
Alaska Medicaid Mental Health Review
Timeframes for Review Submissions
This page is intentionally blank
Appendix E - Alaska Medicaid Mental Health Review
Timeframes for Review Submissions
Submitting Requests for Prior Authorization Reviews

If a review is submitted before these timeframes, the review will be pended and the provider will be requested to submit updated clinical information within these timeframes.

Admissions
• Acute care admissions – on the day of admission, or a day before (when travel is an issue, call as necessary before the date of admission)
• PRTF admissions—on the day of admission, or up to two days before (when travel is an issue, call as necessary before the date of admission)

Timeframes for Continued Stay reviews submissions
• PRTF Master Plan of Care Review—on the 14th day after admission; Federal regulations --42CFR Ch. IV 441.154 require the Master plan of care to be…
  ▪ (a) “developed and implemented no later than 14 days after admission for PRTF; and (b) Designed to achieve the recipient’s discharge from inpatient status at the earliest possible time.
  ▪ The request for review of the written Master Plan of Care is to be submitted on the 14th day after admission for PRTF services and no later than on the 7th day after admission for acute care; i.e., the next review date assigned after admission.
  ▪ The review questions for the Master Plan of Care are in the Continued Stay Review Questionnaire—See the section of questions dedicated to “Written Master Plan of Care Review” or the MPOC Assessment in JIVA.
• Acute care continued stay—Submit the review on the assigned “Next Review Date,” or up to two days before the Next Review Date.
• PRTF care continued stay-- Submit the review on the assigned “Next Review Date,” or up to three days before the “Next Review Date”.

Timeframes for Pended reviews:
When a review has been submitted and is pended awaiting clinical/required information, Qualis Health will notify the provider via QHPP and/or phone. The provider has no more than seven calendar days to submit the requested information before Qualis Health will proceed with the information already submitted. This may result in an adverse determination due to lack of documentation to support the certification of the review.

Exhibit 1 - Example of Prior Authorization for Admission Flow

Initial Contact to Qualis Health

Basic demographic data collected.

Clinical information received and medical necessity criteria applied.

Meets criteria

Certified determination for inpatient admit

Certification notification via web, phone or weekly fax.

To Physician

Qualis Health Physician determines medical necessity

Meets criteria

To Page 2
Prior Authorization Admissions Flow Chart

Qualis Health contacts facility UR department with notification of potential non-certification.

Attending physician notified by facility UR department to contact Qualis Health Physician.

Attending Physician contacts Qualis Health for peer review before end of next day.

Non-certification notification sent by end of business day.

Qualis Health Physician determines medical necessity.

Yes

Certify: notification to appropriate parties.

No

Yes

No
Exhibit 2 - Continued Stay Review Example Flow Chart

Start prior authorization review on next review date → Review meets criteria/Qualis Health Policy → YES: Certify continued stay; assign next review date

NO: Review referred to Physician

Physician determines continued stay medically necessary → YES: Certify; notification to appropriate parties

NO: QH contacts facility UR department with notification of potential non-certification

Attending physician notified by facility UR department to contact Qualis Health Physician

Attending Physician contacts Qualis Health for peer review before end of next day

Non-certification notifications sent by end of business day

NO: Qualis Health Physician determines medical necessity

YES: Certify; notification to appropriate parties
Exhibit 3 - Expedited Appeal Process Example Flow Chart

1. Web, telephone, fax or written request for expedited appeal received within two business days of receipt of initial denial

2. QH may request copies of chart notes or medical record from provider

3. Involved parties have 2 hours to submit more information

4. Information received within 2 hours
   - NO
   - YES

4a. If no additional information is received, the appeal is based on information available

5. QH sends medical records to PIPC licensed in appropriate specialty within one working day of receipt of medical records

6. QH sends medical records to PIPC licensed in appropriate specialty within one working day of receipt of medical records

7. PIPC upholds original determination
   - YES
   - NO

7. PIPC notifies by web or telephone and sends letter to attending physician, hospital, and patient within one working day confirming original determination with clinical rationale and information regarding Qualis Health’s standard appeal process

8. PIPC upholds original determination
   - YES
   - NO

8. PIPC notifies attending physician, hospital, and patient (and claims payer, as required) within one working day with authorization number and approved dates of service, modifying original determination and includes clinical rationale for the services non-certified and information regarding Qualis Health’s standard appeal process

9. PIPC Reverses original determination, approves case
   - YES
   - NO

9. PIPC notifies by web or telephone and sends letter to attending physician, hospital, and patient (and claims payer, as required) within one working day with authorization number and approved dates of service reversing original determination.

PI/PC = Physician/Practitioner Consultant
Expedited Appeal = An appeal of non-certification in a case involving urgent care.
Exhibit 4 - Standard Appeal Process Example Flow Chart

1. Request for standard appeal received within 180 days of initial denial

2. Qualis Health informs other parties that request for appeal has been received and request clinical information to support appeal

3. Involved parties have 7 days to submit more information

4. Information received within 7 days

4a. If no additional information is received, the appeal is based on information available

5. QH sends medical record and/or additional information to P/PC in appropriate specialty

6. P/PC returns completed appeal review with decision to QH within 3 to 8 calendar days

6a. P/PC upholds original determination

6b. P/PC modifies original determination

6c. P/PC Reverses original determination, approves case

6d. P/PC sends letters to attending physician, facility, and recipient confirming original determination with clinical rationale and information regarding next level appeal process

6e. P/PC sends letters to attending physician, facility, and patient modifying original determination, with clinical rationale, certified dates of service, and contractor's appeal process in the letter

6f. QH sends letters with certified dates of service, reversing original determination

P/PC = Physician/Practitioner Consultant

*Review completed and letters mailed within 30 days of receipt of request to perform standard appeal.
Exhibit 5 - Late Submission Review Example Process Flow
Qualis Health has the option of deferring the request to the State UR Committee giving the reasons for the late submission.

State UR Committee notifies both the provider and Qualis Health (via phone, fax, e-mail or mail)

State Approval

Yes

Provider submits a review through the normal process

No

Qualis Health gives a Technical Denial

Provider may follow the regular appeal process
Exhibit 6 - Retrospective Eligibility Review Example Process Flow

Client has been discharged. Eligibility for Medicaid has been approved and is retro active.

Providers to submit completed questionnaire. Preferably submitted by QHPP.

Qualis gives determination within 30 calendar days.

Yes

Approval Given

No

Approval is given based on medical necessity review

Notification is in the weekly approvals fax sent to the provider.

Defer to Qualis Health Physician

MD Determination

Yes

Approval Given

No

Denial

Notification will be sent within one (1) business day. (Peer reviews are not offered for retro reviews.)

The regular appeal process is now followed.
Exhibit 7- Admissions Review Questionnaire

Admission Questionnaire

Notification Date

[Enter the date that you submit the assessment to Qualis Health for review.]

ATTESTATION: You must attest to the Alaska Department of Health and Social Services requirements stated [Please read and affirm/acknowledge each of the four statements. The review will not be accepted without this information.]

1. Select Type of Review

[PRTF admission is typically a ‘PRTF: Non-Emergent Admission. ’A ‘Retrospective’ review is submitted only if the Member has already discharged and the days for the length of stay have not been authorized.]

   Acute: Emergency Admission
   Acute: Non-Emergency Admission
   PRTF: Expedited Admission
   PRTF: Non-Emergent Admission
   Retrospective (Use only if discharged)

2. Involvement with the Referral Source (Select as Many as apply)
   OCS
   DJJ
   SDS
   Outpatient Behavioral Health
   Tribal Behavioral Health
   Special Education
   Substance Abuse Services
   Community Residential Services
3. Select Source of Referral (Select One)

- Acute Care-API
- Acute Care-Prov/Discovery
- Acute Care- North Star
- Acute Care-Other (Psychiatric General H)
- In-state PRTF-North Star/Debarr
- In-state PRTF-North Star/Palmer
- In-state PRTF-Ak Child & Family
- In-state PRTF-Prov Adolescent PRTF
- DET (Designated Evaluation and Treatment) (Adults Fairbanks/Juneau)
- RBRS (Residential Behavioral Rehabilitation Services)
- Outpatient Mental Health
- DJJ
- PRTF In State
- PRTF Out of State
- OCS
- Adoptive Parent
- Parent
- Foster Parent
- Legal Guardian
- Tribal
- Community Behavioral Health Clinic
- Police
- Hospital/Emergency Room
- Education
- Substance Abuse Provider
- Physician
- Other: ________________________________

4. Have the appropriate physician and/or persons certified the need for admission? [The Certificate of Need (CON) needs to be signed by a physician or otherwise appropriate person in your facility and should be in the client’s chart – this can not be done by anyone outside of your facility. A sample CON can be found in the Provider’s Manual. Follow this link: Behavioral Health Inpatient Psychiatric Review Provider Manual]
5. **Select (primary) reason for Treatment Referral (Select Only One)**

[Select the primary reason why client was referred for treatment to your facility]

- Suicidal Ideation/Attempt
- Homicidal Ideation/Attempt
- Aggression to Self
- Aggression to Others
- Psychotic Symptoms
- Self-Mutilating
- Medically complicated
- Eating Disorder
- Autism
- Sexual Acting Out

6. **Select (secondary) reason for Treatment Referral (Select Only One)**

[Select the secondary reason why client was referred for treatment to your facility]

- Suicidal Ideation/Attempt
- Homicidal Ideation/Attempt
- Aggression to Self
- Aggression to Others
- Psychotic Symptoms
- Sexually Reactive Behavior
- Self-Mutilating
- Developmental Age lower than Chronological age
- Eating Disorder
- Autism
- Sexual Acting Out
- Intellectual Developmental Disability
- Other High Risk Behavior: (Describe other high risk behaviors)

7. **Select Prognosis**

- Poor
- Good
- Fair
- Excellent
- Guarded
8. **Ethnicity**

Select all that apply

- American Indian
- Alaska Native
- Asian
- Black
- Hispanic
- Pacific Islander
- White
- Unknown
- Other: ___________________________________________________

9. **Has the recipient been adopted?**

Yes
No

10. **Name of guardian, parent, adoptive parent, or social worker (For 21 and under only)**

[PRTF facilities: Please be prepared to provide the name, address and phone number for parents/social worker and your facility therapist/case manager/discharge planner who will be assigned to this case at the NOTES tab of the online Portal episode file upon admission to your facility.]

11. **Select Custody Status (For 21 and under only)**

- Non custody
- DJJ - Juvenile Justice  [name of case worker is required at question 10]
- OCS - Office of Children's Services  [name of case worker is required at question 10]
12. **Select Region of Home Community (Select Only One)**

[Qualis health web site will show by zip code or city correct region]

- Anchorage South-Central
- Northern Southwest
- Mat-Su Southeast

13. **Select Living Situation prior to this admission (Select Only One)**

- Correctional Center/Detention
- Correctional Center/Institutional
- Adult/Correctional Center
- Family
- Foster Home
- Group Home
- Residential Child Care Facility
- Adoptive Family
- Shelter
- PRTF
- Friends
- Relatives
- Homeless
- Assisted Living Home/ALF
- Nursing Home
- Other: ____________________________________________

14. **Name Last OOS PRTF** [Please put UNKNOWN if information is not available]

15. **Last OOS PRTF Admission Date** (mm/dd/ccyy format)

16. **Last OOS PRTF Discharge Date** (mm/dd/ccyy format)

17. **Name Last Acute Care (Psychiatric)** [Please put UNKNOWN if information is not available]
18. **Last Acute Care (Psychiatric) Admission Date** (mm/dd/ccyy format):

19. **Last Acute Care (Psychiatric) Discharge Date** (mm/dd/ccyy format):

20. **Last In-state PRTF** [Please put UNKNOWN if information is not available]

21. **Last In-state PRTF Admission Date** (mm/dd/ccyy format):

22. **Last In-state PRTF Discharge Date** (mm/dd/ccyy format):

23. **Name Last Out of Home Community Residential Treatment Services** [Please put UNKNOWN if information is not available]

24. **Last Out of Home Community Residential Treatment Services Admission Date** (mm/dd/ccyy format):

25. **Last Out of Home Community Residential Treatment Services Discharge Date** (mm/dd/ccyy format):

26. **Last Assisted Living Home** [Please put UNKNOWN if information is not available]

27. **Last Assisted Living Home Admission Date** (mm/dd/ccyy format):

28. **Last Assisted Living Home Discharge Date** (mm/dd/ccyy format):

29. **Select Level of Cognitive Functioning:**
   Does the youth have Low cognitive functioning?
   - Yes
   - No
   IQ under or suspected to be under 70?
   - Yes
   - No
   Diagnosis on Autism Spectrum?
   - Yes
   - No
Does the individual have a Developmental Disability? (Describe)
   Yes
   No

Developmental Age:

This section must be completed if one or more of the responses above is yes.
[Contact Qualis Care Coordinator if you need assistance obtaining information about an SDS client]

   What is the client’s IQ score: _____

[Acute: By the end of 30 days, lengths of stays may be shortened if the review does not include an IQ score.]
[PRTF: By the 4th review, lengths of stays may be shortened if the review does not include an IQ score.]

Has DD provider been contacted to help facilitate discharge planning?
   Name of Provider?
   Has an application for services been filed with SDS?
      If yes, what is the status?
      If not, why not?

Does the youth have a Waiver through Senior and Disability Services (SDS)?
   • Yes  • No  If yes, what type?
      • Intellectual/Developmental Disability (IDD)
      • Children with Complex Medical Conditions (CCMC)

Does the youth have access to other services through DD providers? If so, please describe and identify the agency providing the services.

What Care Coordinator (or SDS staff person) is providing services? Name and Phone #

30. Does the recipient have a current IEP? Yes, NO, or Unknown
[Acute: By the end of 30 days, lengths of stays may be shortened if the review does not include current IEP status.]
[PRTF: By the 4th review, lengths of stays may be shortened if the review does not include current IEP status.]
31. Select applicable Trauma (Select All That Apply)

[It’s important to select all that apply. This information is vital for reporting purposes.]

Natural Disaster
Physical Abuse
Domestic Violence
Sexual Abuse
Emotional Abuse
Death
Suicide
Multiple Placements
Neglect
Multiple Losses
Adopted
Terminated Adoption
None Identified
Other: _________________________________________________

32. Enter date of last Mental Status Exam (mm/dd/ccyy format):

[PRTF: the MSE must be dated within the previous 7 days prior to submitting the review. Acute care: the MSE must be dated within the previous day or upon admission to your facility]

33. Select certification of person who performed or supervised the MSE

Physician
Mental Health Professional
Other (Specify)

34. Was the recipient receiving Outpatient Services (OP) prior to this admission

[Acute: was the recipient receiving outpatient services prior to this admission? PRTF: were there outpatient services prior to recipient going into acute care?]
Yes  *enter name of primary OP provider and service provided*
No
Unknown

35. **Select Risk Factor/s (Select All That Apply)**

- Flight Risk/Running Behaviors
- Suicide Risk
- Suicidal Ideation
- Suicidal Attempt
- Homicidal Ideation
- Homicidal Attempt
- Problems with ADLs
- Sexually Acting Out
- Aggression to Self
- Aggression to Others
- Substance Abuse
- Medically Complicated
- Eating Disorder
- Autism
- Sexually Reactive Behavior
- Developmental Age Lower than Chronological Age
- Neurological Problems
- Intellectual Developmental Problems
- Non-Compliance with Treatment
- Guardian/Parent Non-Compliance with Treatment
- Legal Problems
- Impulsivity
- Psychosis/Psychotic Symptoms
- Fire Setting
- Treatment Failures
- Family History MH
- Family History Substance Abuse
- Hx self-Mutilating
- Property Destruction
- School Suspensions
None Identified
Other High Risk Behaviors  Describe

36. Is recipient a Sex Offender?  Yes  or  No

37. Enter Medical Condition that may impact treatment Description OR Code
   [Please list either a diagnosis or put ‘Deferred’ or ‘None’ –]

38. Psychosocial ICD-10 Diagnosis Code Problems/Stressors (Enter All That Apply)

39. Select Co-Morbidity (Select All That Apply):
   - Thought D/O
   - Mood D/O
   - Substance Abuse
   - Medically Complicated
   - Eating D/O
   - Developmental D/O
   - FASD
   - Suspected FASD
   - Traumatic Brain Injury
   - Medical Disability
   - Psychotic Disorder
   - None Identified
   - Other: ___________________________________________________

40. Has the Plan of Care (POC) been formulated in consultation with the recipient (for adults)
    or recipient and the guardian (for minors)?
    Yes
    No

41. Has the Plan of Care (POC) been formulated in consultation with the Physician? Yes  or  No

42. Has the Plan of Care (POC) been formulated in consultation with the RN? Yes or No
43. **RPTC Only**: Has the Plan of Care (POC) been formulated in consultation with the Licensed Clinical Social Worker? Yes or NO

44. **Enter Anticipated Discharge Date** (Enter in mm/dd/ccyy format):

45. **Anticipated Discharge Plan** (Must clearly specify post-discharge service needs including any prospective post-discharge service providers and any other provision necessary for transition to a lesser restrictive environment and adult services):

   [Discharge planning must begin before client arrives to your facility. Please provide best detailed discharge information to include treatment needs, identified services, and identified providers with contact information. Include considerations regarding medication management, housing, family, and educational services in addition to Individual Therapy (IT), Family Therapy (FT), Group Therapy (GT) and other identified therapeutic interventions. Provider contact information is required upon admission.

   **Acute**: By the 2nd review, length of stays may be shortened due to lack of appropriate discharge elements received if no lower level of care provider has been identified.

46. **Describe acute disturbances related to the behavioral disorder**:

   [Please enter all clinical information that supports the need for your level of care at this time in recipient’s treatment.

   **Acute**: this needs to be most recent behaviors and symptoms within the last 24 to 48 hours.

   **PRTF**: If recipient is in acute, please enter the following in addition to the justification for acute care: description of acute symptoms during the last 60 days; description of interventions or services used to prevent PRTF placement. Is the recipient stabilized in acute care? If so, please explain why the recipient cannot be treated at a level of care lower than PRTF.

   Please explain why PRTF care is required for this recipient at this time. Specifically describe the type, intensity, duration, and frequency of behaviors that interfere with success at lower levels of care. What is the prognosis for the recipient if s/he does not go to PRTF?
**For all review types** please include information such as dates, seriousness, and frequency of symptoms. Labels such as aggressive, out of control behavior, or danger to self and others is not sufficient as we require specifics.

47. **Brief description of Psychosocial History** (include explanation of trauma events):

[Please describe all psychosocial history that pertains to the youth requiring care.]

48. **Initial Plan of Care** (Goals and objectives that are measurable and individualized):

[Please call out specific goals and objectives for individual, family and group therapies. Each diagnosis should be addressed in goals and objectives formulated. The Plan of Care should cover what the plan is expected to be completed **throughout the entire length of stay**.]

49. **Medication History** - Enter Current and Past Medication Use and Its Effectiveness, Side effects, allergies, or adverse reactions.

[It is important that this is answered and not left blank. If client is not on any medications, please put “none” so as to not leave this question blank. Please list all medications recipient is currently on upon admission, and all history of medications known.]

50. **List Safety Precautions in place:**

[Please include details of precautions; not just titles for types of precautions. Please include details of actual precaution and interventions that will be taken.]
Exhibit 8 -Continued Stay Review Questionnaires

Continued Stay Questionnaire

Notification Date

[Enter the date that you submit the assessment to Qualis Health for review.]

ATTESTATION: You must attest to the Alaska Department of Health and Social Services requirements stated

[Please read and affirm/acknowledge each of the four statements. The review will not be accepted without this information.]

1. Select Custody Status

   Non custody
   DJJ - Juvenile Justice  [name of case worker is required at question 10]
   OCS - Office of Children's Services  [name of case worker is required at question 10]

2. Enter Anticipated Discharge Date

3. Enter Medical Condition that may impact treatment Description OR Code

   [Please list either a diagnosis or put ‘Deferred’ or ‘None’]

4. Select type of Continued Stay Review

   Concurrent
   TTD
5. Describe acute disturbances, self care deficits or imminent risk to self, others, impaired safety, or severely impaired role functioning (e.g. thought disorders or other acute disturbances pertaining to the primary and (if any) secondary diagnoses):

6. Updated Plan of Care Treatment Goals (Updated diagnosis and treatment plan. Specify the measurable goals and progress on treatment plan and in weekly Individual, Family and Group Psychotherapies):

7. List Safety Precautions in place

8. ANY Medication changes (to include Date ordered and D/C, Dosage/Route, Frequency, Compliance, Drug level, if applicable, and effectiveness):

9. Legal charges during this review period:

10. Medical services provided during this review period:

11. List diagnostic testing planned with results and recommendations since last review:

12. Updated IQ score to report Yes, No, If yes, enter updated FSIQ:

12. IEP received or updated Yes No If Yes enter when IEP was updated or received

13. Updated DC Plan (Placement, Tx needs, anticipated providers, education svcs, community supports, individualized svcs, respite svcs, medical needs. Add contact information. List concerns and efforts towards timely discharge):
Master Plan of Care - PRTF

Notification Date
[Enter the date that you submit the assessment to Qualis Health for review.]

ATTESTATION: You must attest to the Alaska Department of Health and Social Services requirements stated
[Please read and affirm/acknowledge each of the four statements. The review will not be accepted without this information.]

1. Select Custody Status

   Noncustody
   DJJ - Juvenile Justice [name of case worker is required at question 10]
   OCS - Office of Children's Services [name of case worker is required at question 10]

2. Enter Anticipated Discharge Date

3. Enter Medical Condition, Description OR Code

4. Has the Master Plan of Care been formulated in consultation with the recipient and/or the recipient’s family or guardian

5. Select the elements included in the written MPOC for this recipient (Select all that apply)

   [Please select all elements of the MPOC that apply – must include individual, family, and group psychotherapy as well as medication management]

   Activity and Recreational Therapies
   Baseline Assessment of Functioning
   Collaboration with Care Coordinator
   Contacts with JPO, OCS, JJ, if required
   Crisis/Safety Plan Intervention
   Educational Needs Assessment/Plan
   Evaluation of Recipient's Strengths
Family Psychotherapy
Further Diagnostic Evaluation
Group Psychotherapy
Group Skill Development Services
Identified Strengths of Recipient
Individual Psychotherapy
Individual Skill Development Services
Measurable Objectives for each Problem
Neuropsych Testing
Nutritional/Diet Screening and Planning
Pharmacologic Management
Physical Examination
Psychosocial History
Tx Goals/Problems Identified
Other

5a. Explain ‘Other’

6. All Medications (include date ordered and discharge, dosage/route, frequency, compliance, drug level if applicable, and effectiveness)

7. List Safety Precautions in place:

8. List the identified problems statement and their goals according to their related diagnosis. Note specific measurable goals, related to individual, family, and group therapies.

9. Discharge plan (based on treatment goals and objectives, specifies approximately discharge date based on achievement of those stated objectives and post discharge services. Plan must be continually updated to reflect changes and progress in treatment planning).
Master Plan of Care - ACUTE

Notification Date
[Enter the date that you submit the assessment to Qualis Health for review.]

   - Neuropsych Testing
   - Nutritional/Diet Screening and Planning
   - Pharmacologic Management
   - Physical Examination
   - Psychosocial History
   - Tx Goals/Problems Identified
   - Other – if selected, answer question 13a

11a. Explain ‘Other’

12. Has the Master Plan of Care been formulated in consultation with the recipient and/or the recipient’s family or guardian

13. All medications (date ordered and discharge, dosage/route, frequency, compliance, drug level if applicable, and effectiveness.

14. List safety precautions in place:
15. List the identified problems statement and their goals according to their related diagnosis. Note specific measurable goals, related to individual, family, and group therapies.

16. Discharge plan (based on treatment goals and objectives, specifies approximately discharge date based on achievement of those stated objectives and post discharge services. Plan must be continually updated to reflect changes and progress in treatment planning).

17. Discharge Placement, Tx needs, anticipated providers, education svcs, community supports, individualized svcs, respite svcs, medical needs. Add contact information. List concerns and efforts towards timely discharge:
Exhibit 9 - Referral form for Potential Out of State admission

State of Alaska
Behavioral Health
Utilization Review Referral Form

Complete this form as soon as you become aware that an out-of-state admission may be advised for a youth who is not in state custody.

Date: __________________________

Fax to: 907-269-8166 Attention:
Doug Lindsay | Judy Helgeson | Maureen McGlone | Reta Sullivan | Timothy Brown

Referring Facility/Agency: ____________________________________________________
Staff Contact Name: _________________________________________________________
Contact Phone Number: __________________________________ Fax #: __________________

Recipient Information:
Name: ________________________________________________________________
Medicaid Number: __________________________ Other Insurance: ______________________
Date of Birth: __________________________ Projected Discharge Date: ______________
Parent or Legal Guardian Name: _______________________________________________

Is recipient involved with: □ Outpatient Mental Health
☐ DJJ  ☐ Behavioral Rehabilitation Services
☐ OCS  ☐ Tribal Behavioral Health
☐ SDS  ☐ Special Education
☐ Community Behavioral Health ☐ Substance Abuse Services

Section A

1. Family strengths, talents, positive qualities:
__________________________________________________________________________

2. Client strengths, hobbies, interests, positive qualities:
__________________________________________________________________________

3. What do the parents/guardians want for the youth and why?
__________________________________________________________________________
4. What parent/peer navigation information have you provided to this family? (e.g.: Stone Soup Group, Alaska Youth & Family Network)

5. Did parents contact parent/peer navigator? ☐ Yes ☐ No

Section B
This section must be completed if the youth has an IQ under 70, a diagnosis on the Autism Spectrum, or Other Developmental Disability. (note: Senior and Disability Services may be able to provide some of the following information if they have a Release of Information (ROI). SDS can be reached at: 907 269-3607 http://dhss.alaska.gov/dsds/Pages/dd/default.aspx)

1. Does the youth have
   ☐ No ☐ Yes
   ☐ ☐ Diagnosis on Autism Spectrum
   ☐ ☐ Other Developmental Disability (Describe) ________________________________

2. What is the youth’s
   IQ Score: __________________
   Developmental Age: _________________

3. What DD provider contacted to help facilitate discharge planning?
   ____________________________ Outcome: ____________________________

4. Has an application for services been filed with SDS? ☐ Yes ☐ No
   If yes, what is the status? ____________________________
   If not, why not? ____________________________

5. Does the youth have a Waiver through Senior and Disability Services (SDS)?
   ☐ Yes ☐ No
   If yes, what type?
   ☐ Intellectual/Developmental Disability (IDD)
   ☐ Children with Complex Medical Conditions (CCMC)

6. Does the youth have access to other services through DD providers? If so, please describe and identify the agency providing the services.

7. What agency (or SDS staff person) is providing SDS care coordination services?

Exhibit 10 - Certificate of Need (CON) for Admissions
Medicaid Inpatient Psychiatric Services
Medical Evaluation Certifying Need for Inpatient Care

Check One:  □ Acute Inpatient   □ PRTF

Upon admission, a physician member of the Interdisciplinary Treatment Team, according to 70AAC 43.552(f)(1); and another member of the Interdisciplinary Treatment Team, according to 7AAC 43.55(f)(3) must certify need for care by documenting why the recipient requires inpatient treatment.

Recipient's Name: ___________________________ Medicaid ID Number: ______________

61. Document in your chart: (A) why Ambulatory care resources available in the local community do not meet the treatment needs of the recipient, and for out-of-state treatment, (B) why inpatient care within the State of Alaska will not meet the treatment needs of the recipient:
   (A) _______________________________________________________________________
   (B) _______________________________________________________________________

62. Document why proper treatment of the recipient’s psychiatric condition requires services on an in-patient basis under the direction of a physician:
    _______________________________________________________________________

63. Document how the proposed services can reasonably be expected to improve the recipient’s condition or prevent further regression so that services will no longer be needed:

completed during the shift in which it ends. Each documentation must include all of the following:

| Met | Not Met | 483.358(h)(1) each order for R or S as required in paragraph (g) above; |
| Met | Not Met | 483.358(h)(2) The time the emergency safety intervention actually began and ended; |
| Met | Not Met | 483.358(h)(3) The time and results of the 1-hour assessment required above; |
| Met | Not Met | 483.358(h)(4) The emergency safety situation that required the resident to be restrained or put in seclusion; |
| Met | Not Met | 483.358(h)(5) The name of staff involved in the emergency situation. |
| Met | Not Met | 483.358(i) The facility must maintain a record of each emergency safety situation, the interventions used, and their outcomes. |
| Met | Not Met | 483.358(j) The physician or other licensed practitioner permitted by the state and the facility to order R or S must sign the R or S order in the resident’s record as soon as possible. |

**CONSULTATION WITH TREATMENT TEAM PHYSICIAN**

| Met | Not Met | 483.360 If a physician or other licensed practitioner...orders the use of R or S, that person must contact the resident’s treatment team physician, unless the ordering physician is in fact the resident’s treatment team physician. The person ordering the use of R or S must consult with the resident’s treatment team physician as soon as possible and inform the team physician of the emergency safety situation that required the resident to be restrained or placed in seclusion and |
| Met | Not Met | 483.360(b) document in the resident’s record the date and time the team physician was consulted. |

**MONITORING OF RESIDENT IN AND IMMEDIATELY AFTER RESTRAINT**

| Met | Not Met | 483.362(a) Clinical staff trained in the use of emergency safety interventions must be physically present, continually assessing the physical and psychological well-being of the resident and the safe use of restraint throughout the duration of the emergency safety intervention. |
| Met | Not Met | 483.362(b) If the emergency situation continues beyond the time limit of the order, a RN or other licensed staff must immediately contact the ordering physician or other licensed practitioner permitted by the state and the facility to order R or S to receive further instructions. |
| Met | 483.362 (c) A physician or other licensed practitioner permitted by the state and facility to evaluate the resident’s well-being and trained in the use of |
MONITORING OF THE RESIDENT IN AND IMMEDIATELY AFTER SECLUSION

| Met | Not Met | 483.364 Clinical staff trained in use of emergency interventions must be physically present in or immediately outside the seclusion room, continually assessing, monitoring and evaluating the physical and psychological well being of the resident in seclusion; and video monitoring does not meet the requirement. |
| Met | Not Met | 483.364(b) A room used for seclusion must allow staff full view of the resident in all areas of the room and |
| Met | Not Met | 483.364(b)(2) be free of potentially hazardous conditions such as unprotected light fixtures and electrical outlets. |
| Met | Not Met | 483.364(c) If the emergency situation continues beyond the time limit of the order, a RN or other licensed staff must immediately contact the ordering physician or other licensed practitioner...to receive further instructions. |
| Met | Not Met | 483.364(d) A physician or other licensed practitioner permitted ...must evaluate the resident’s well-being immediately after the resident is removed from seclusion. |

NOTIFICATION OF PARENT(S) OR LEGAL GUARDIAN(S)

| Met | Not Met | 483.366 If the resident is a minor, the facility must notify the parent or legal guardian of the resident who has been restrained or secluded as soon as possible after the initiation of each emergency safety intervention. <see regulation & facility policy> |
| Met | Not Met | 483.366(b) The facility must document in the resident’s record that the parents or legal guardian has been notified of the emergency safety intervention, including the date and time of notification and the name of the staff person providing the information. |

APPLICATION OF TIME OUT

| Met | Not Met | 483.368 A resident in time out must never be physically prevented from leaving the time out area. |
| Met | Not Met | 483.368(b) Time out may take place away from the area of activity or from others residents, such as resident’s room (exclusionary) or in the area of activity of other residents (inclusionary). |
| Met | Not Met | 483.368(c) Staff must monitor the resident while he or she is in time out. |

POST INTERVENTION DEBRIEFINGS

<p>| Met | 483.370 Within 24 hours after use of R or S, staff involved in the emergency intervention must debrief in accordance with facility policy. |</p>
